In The Matter of the Application of SAN DIEGO GAS
& ELECTRIC COMPANY (U 902 E) for a Permit to
Construct The Salt Creek Substation Project

Application 13-09-_____

**APPLICATION OF SAN DIEGO GAS & ELECTRIC COMPANY (U 902 E)
FOR A PERMIT TO CONSTRUCT THE SALT CREEK
SUBSTATION PROJECT**

I. INTRODUCTION

Pursuant to General Order (GO) 131-D, the California Environmental Quality Act (CEQA), the California Public Utilities Code, and the Rules of Practice and Procedure of the California Public Utilities Commission (Commission), San Diego Gas & Electric Company (SDG&E) files this Application (Application) for a Permit to Construct (PTC) the Salt Creek Substation Project (Proposed Project). As set forth in the accompanying Proponent's Environmental Assessment (PEA), the main purpose of the Proposed Project is to build a new distribution 69/12-kV substation and associated 69-kV power tie lines to serve existing and planned residential and commercial development in the southeastern portion of the City of Chula Vista, and to provide the required power network to serve this region. The primary objective of the Proposed Project is to meet existing and anticipated customer-driven electrical load growth, and to provide the necessary distribution and power network to avoid potential long-term outages or disruptions of service to existing and future customers in this region of SDG&E's service territory. Construction of the Proposed Project is anticipated to require 18 or more months from initial site development through energization and testing. The proposed in-service date

for the new substation facilities is March 2016. A complete project description is included in the PEA, which is Volume II of this application. The PEA will be referenced in this Application pursuant to GO 131-D, Section IX.B.1.e.¹

II. SUMMARY OF REQUEST

SDG&E submits this Application requesting that the Commission, upon completion of its review of this Application, issue and certify an appropriate environmental document and issue an expedited *ex parte* decision granting SDG&E a PTC authorizing SDG&E to construct the Proposed Project set forth in this Application, PEA and the accompanying documents within the proposed timelines set forth in Section IV.A.4.d of this Application.

III. PROJECT BACKGROUND

A. Purpose and Need

The Proposed Project would consist of construction of a new 69/12-kV substation and a new 69-kV power line from the Existing Substation to the proposed Salt Creek Substation (TL 6965), and the looping of TL 6910 into the proposed Salt Creek Substation. The Proposed Project would provide additional capacity to serve existing area load and future customer-driven electrical load growth. In addition, it would provide the necessary distribution and power network to prevent long-term outages or disruptions of service to existing customers in the southeastern portion of SDG&E's service territory. For a more detailed discussion of the purpose and need for the Proposed Project, *see* Chapter 2, *Project Purpose, Need, and Objectives* of the PEA, Volume II of this Application.

¹ Other required information for a PTC application under the Commission's Rules of Practice and Procedure are contained in this Application or its appendices.

B. Project Site

The Proposed Project is located in southwestern San Diego County. The proposed Salt Creek Substation site, the power tie-line (TL) 6910 loop-in, and the majority of TL 6965 are located in the eastern portion of the City of Chula Vista, California. A small segment (approximately 4,700 linear feet) of the northernmost portion of TL 6965 is located in an unincorporated portion of San Diego County on SDG&E fee-owned land surrounding the Existing Miguel Substation (herein referred to as the Existing Substation). The Existing Substation is on SDG&E fee-owned land in unincorporated San Diego County.

The majority of the Proposed Project would be located east of State Route (SR) 125 in the southwesterly portion of San Diego County (refer to PEA Figure 3-1, Regional Map; Figure 3-2, Vicinity Map; and Figure 3-3, Project Overview). A small segment of the proposed TL 6965 (approximately 6,100 linear feet) would be located on the west side of SR-125, with two overhead crossings over SR-125. The Proposed Project would be situated approximately 15 miles southeast of downtown San Diego and 5 miles north of the international border with Mexico.

C. Project Objectives

The Proposed Project is being proposed to meet the following primary objectives:

- Meet the area's projected long-term electric distribution capacity needs by constructing the proposed Salt Creek Substation near planned load growth to maximize system efficiency.
- Provide three 69-kV circuits into the Salt Creek Substation to serve load growth in the region and meet the regulatory requirements of the North American Electric Reliability Corporation (NERC), Western Electric Coordinating Council (WECC), and California Independent System Operator (CAISO).

- Provide substation and circuit tie capacity that would provide additional reliability for existing and future system needs.
- Reduce loading on area substations to optimum operating conditions, providing greater operational flexibility to transfer load between substations within the proposed Salt Creek Substation service territory.
- Comply with and respect the outcome of the extensive community-based public process to select a site for a new substation in the Otay Ranch area, as evidenced by City of Chula Vista City Council Resolution 2011-073.
- Meet Proposed Project needs while minimizing environmental impacts by siting the substation on property designated for future development that is located outside of the City of Chula Vista's MSCP Preserve.
- Locate proposed new power facilities, as appropriate and as needed, within existing utility ROWs, access roads, and utility-owned property.

For a more detailed discussion of the objectives for the Proposed Project, *see* Chapter 2, *Project Purpose, Need, and Objectives* of the PEA, Volume II of this Application.

D. Project Description

The Proposed Project includes the following main components:

- Salt Creek Substation: Construction and operation of a new 120-MVA 69/12-kV substation, known as Salt Creek Substation, including construction and operation of underground 12-kV distribution circuits on 11.64 acres of undeveloped land.
- TL 6965: Construction and operation of a 5-mile-long 69-kV power line (TL 6965) within the existing Transmission Corridor, from the Existing Substation to the proposed Salt Creek Substation. The majority of TL 6965 would be located above ground; the final 1,000 linear feet in the vicinity of the Salt Creek Substation would be installed underground.
- TL 6910 Loop-In: Construction and operation of an underground 69-kV power line loop in (TL 6910) to the proposed Salt Creek Substation. Trench installation would total approximately 1,000 linear feet from the cable pole to the substation terminal equipment.

- Existing Substation Modifications: Installation of a new 69-kV power line position at the Existing Substation to connect to TL 6965.

The Proposed Project components, their locations, preliminary configuration, and the existing and proposed system configuration are presented in Chapter 3, *Project Description* of the PEA, Volume II of this application.

Existing Substation Modifications

The Existing Substation is located east of SR-125 in an unincorporated portion of San Diego County, bounded by San Miguel Road on the north and the City of Chula Vista on the south. The Existing Substation is located on an approximately 200-acre parcel owned by SDG&E. The proposed modification would consist of extending the 69-kV rack to accommodate space for TL 6965. An existing power line (TL 643) would be relocated to the new rack position, and the vacant position left by TL 643 would accommodate the new TL 6965 line. Due to the location of the overhead poles allowing both lines to exit the substation, shifting the transmission positions is necessary. This modification would be located in the Existing Substation.

Existing Transmission System

Currently, three overhead transmission circuits are located in the Transmission Corridor between the Existing Substation and the proposed Salt Creek Substation, as provided in PEA Appendix 3-A, Existing Transmission System. Existing TL 6910 is located on a combination of wood and steel poles along the west side of the 120-foot-wide Transmission Corridor connecting the Existing Substation to the Border Substation in Otay Mesa. TL 23041 and TL 23042 are located on double-circuit steel lattice towers along the centerline of the Transmission Corridor, connecting the Existing Substation to SDG&E's Otay Mesa Substation. Seven structures along a portion of

TL 643 and one structure on TL 6910, which are located on SDG&E's Existing Substation property, would be used to complete the TL 6965 connection to the 69-kV bay position at the Existing Substation.

Salt Creek Substation

The proposed Salt Creek Substation site is located adjacent to and southeast of Hunte Parkway, where SDG&E's Transmission Corridor crosses Hunte Parkway. The proposed Salt Creek Substation site consists of 11.64 acres of undeveloped land, as shown in PEA Figure 3-3, Project Overview. The substation pad would be approximately 45 to 50 feet below the general Hunte Parkway elevation.

TL 6910 Loop-In

TL 6910 is an existing 69-kV circuit with terminal points at SDG&E's Existing Substation and Border Substation. Border Substation is located on Otay Mesa in the City of San Diego. As part of the Proposed Project, SDG&E would open TL 6910 by installing two new steel cable poles, and intercepting and looping the power line underground via two new 69-kV duct packages. The new 69-kV duct packages would be installed in two separate 300-foot-long trench alignments, originating at the existing Transmission Corridor and extending into the proposed Salt Creek Substation. The existing TL 6910 would then be re-configured as TL 6910 (Border - Salt Creek) and TL 6964 (Existing Substation – Salt Creek). Refer to PEA Appendix 3-A for a figure showing the schematic power line configuration. The fiber-optic line on TL 6910 would also be looped into the proposed Salt Creek Substation via the same cable poles and duct packages. The fiber-optic line would be available when the Proposed Project goes into construction.

TL 6965

A new overhead 69-kV power line, approximately 5 miles long, would be constructed from the Existing Substation and extending southerly to the proposed Salt Creek Substation, as shown in PEA Figure 3-3, Project Overview. The northernmost 4,700 linear feet would be located on SDG&E's fee-owned property in an unincorporated portion of San Diego County. The remainder of the power line would be constructed overhead within SDG&E's existing 120-foot-wide Transmission Corridor within the City of Chula Vista, where it would terminate on a new cable pole located approximately 1,200 feet southeast of Hunte Parkway. The final approximately 1,000-foot-long segment of TL 6965 would be undergrounded from the cable pole to the substation rack. Seven existing structures along a portion of TL 643 and one existing structure on TL 6910, which are located on SDG&E's Existing Substation property, would be used to complete the TL 6965 connection to the Existing Substation. Pole-top work would be required to add insulators and conductors to connect TL 6965.

Distribution Facilities

The underground distribution circuits would be located within the proposed Salt Creek Substation site; therefore, throughout this PEA document, underground distribution circuits are discussed in association with the proposed Salt Creek Substation.

The ultimate conduit facility would be installed underground in the improved substation access road from the proposed Salt Creek Substation up to the manhole/vault installation located in the Hunte Parkway public ROW. Three distribution circuits would be installed underground in the conduit facility. Distribution circuits would then be extended from these vaults, known by SDG&E Distribution as manholes, to tie in to

existing distribution circuits, also located in existing public ROW, consistent with SDG&E's franchise agreement with the City of Chula Vista. Refer to PEA Appendix 3-A.

IV. STATUTORY AND PROCEDURAL REQUIREMENTS

GO 131-D, Section IX.B. requires an applicant for a PTC to comply with the Commission's Rules of Practice and Procedure, Rule 2. Pursuant to this requirement, SDG&E responds as follows:²

A. Rule 2.1(a) – (c)

In accordance with Rule 2.1(a) – (c) of the Commission's Rules of Practice and Procedure, SDG&E provides the following information.

1. Statutory Authority

This Application is made pursuant to the CEQA, GO 131-D, the Commission's Rules of Practice and Procedure, and prior decisions, orders and resolutions of this Commission, including but not limited to Decision No. 94-06-014 and 95-08-038.

2. Rule 2.1(a) - Legal Name and Address

The applicant is San Diego Gas & Electric Company, a corporation organized and existing under the laws of the State of California, and an investor-owned public utility as defined by Section 216 (a) and 218 (a), respectively, of the California Public Utilities Code, and engaged in the business of purchasing, selling, generating, transmitting, distributing, and providing electric and gas energy service to approximately 3.4 million consumers through 1.4 million electric meters and more than 840,000 natural gas meters

² Although not specifically discussed herein, SDG&E's Application also complies as necessary to Rule 1.5 ("Form and Size of Tendered Documents"), Rule 1.13 ("Tendering and Review of Document for Filing"), Rule 7.1 ("Categorization, Need for Hearing"), Rule 8.1 ("Definitions"), Rule 8.2 ("Ex Parte Requirements"), Rule 13.3 ("Assigned Commissioner Presence"), and Rule 13.13 ("Oral Argument before Commission").

throughout San Diego County and in a portion of southern Orange County, California. The utility's service area spans 4,100 square miles and 25 cities and unincorporated areas in southwestern California, United States. The activities of SDG&E are regulated by this Commission and by the Federal Energy Regulatory Commission. SDG&E is a wholly-owned, indirect subsidiary of Sempra Energy, whose shares are publicly traded. SDG&E's principal place of business is 8330 Century Park Court, San Diego, California 92123.

3. Rule 2.1(b) - Correspondence

Correspondence or communications regarding this Application should be addressed to:

ALLEN K. TRIAL
Attorney for:
San Diego Gas & Electric Company
101 Ash Street, HQ12B
San Diego, California 92112
Tel: (619) 699-5162
Fax: (619) 699-5027

with copies to:

JENNIFER E. PIERCE
Regulatory Case Administrator
San Diego Gas & Electric Company
8330 Century Park Court, CP32D
San Diego, CA 92123
Tel: (858) 654-1685
Fax: (858) 654-1788
JPierce@semprautilities.com

4. Rule 2.1(c)

a. Proposed Category of Proceeding

In accordance with Rule 7.1, SDG&E requests that this Application be categorized as ratesetting because the costs for the new power line facilities will be recovered by SDG&E through its retail rates, and because this Application neither raises questions of policy or rules of general applicability, nor adjudicates any allegations of violations of law. In addition, because this Application raises ancillary issues that do not fall clearly into a single category, Rule 7.1(e)(2) requires that it be categorized as a ratesetting proceeding.

b. Need for Hearings

SDG&E does not believe that approval of this Application will require hearings. SDG&E has provided ample information, analysis and documentation that provide the Commission with a sufficient record upon which to grant the relief requested on an *ex parte* basis. SDG&E respectfully requests that the relief requested in this Application be provided on an *ex parte* basis as provided for in G.O. 131-D, Section IX.B.6.

c. Issues to be Considered

The issues to be considered are described in this Application, PEA and the accompanying documents. Based on the PEA, SDG&E believes the Proposed Project will not have a significant adverse impact on the environment. Therefore, SDG&E requests that the Commission issue a decision within the time limits prescribed by Cal. Gov. Code § 65920 et seq. (Permit Streamlining Act) as provided for in G.O. 131-D, Section IX.B.6.

d. Proposed Schedule

Section IX.B.1.a. of GO 131-D requires that applicants for a PTC include a proposed schedule for authorization, construction, and commencement of operation of facilities. This proceeding involves Commission’s: (1) environmental review of the Proposed Project in compliance with the CEQA (Public Resources Code Section 21100 *et seq.*) and GO 131-D; and (2) issuance of a PTC authorizing SDG&E to construct the Proposed Project. In accordance with Section IX.B.1.a. of GO 131-D, SDG&E submits a Proposed Construction Schedule, which is attached to this Application as Appendix A. Given the pressing need of commencement of operation of facilities and lack of anticipated environmental issues or public controversy connected with the Proposed Project, SDG&E proposes the following schedule for this Application:

<u>ACTION</u>	<u>DATE</u>
Application filed	September 25, 2013
Provide Notice of Filing of Application by direct mail, advertisement and on-site posting	October 07, 2013 (Within 10 days after filing)
File a Declaration of Mailing and Posting	October 28, 2013 (Within 5 days of completion)
Application Completeness Determination by Commission	October 25, 2013 (30 days after Application filed)
Last Date for Protest and Request for Public Hearings	October 25, 2013 (30 days after notice ³)
Draft EIR or Negative Declaration Issued by Commission for Public Comment	January 08, 2014 (105 days)

³ GO 131-D, Section XII. provides in part that any person entitled under the Commission’s Rules of Procedure to participate in a proceeding for a permit to construct may, within 30 days after the notice was mailed or published (as provided under Section XI. of GO 131-D), object to the granting in whole or in part of the authority sought by the utility and request that the Commission hold hearings on the application.

Close of Public Comment Period on Draft EIR or Negative Declaration	February 24, 2014 (45 days after notice of availability)
Proposed Date for Release of Final EIR or Negative Declaration	March 2014
Draft Decision Issued	April 2014
<i>Ex Parte</i> Decision Issued. Final CEQA Document Certified.	June 2014

B. Rule 2.2 – Articles of Incorporation

A copy of SDG&E's Restated Articles of Incorporation as last amended, presently in effect and certified by the California Secretary of State, was filed with the Commission on August 31, 2009 in connection with SDG&E's Application No. 09-08-019, and is incorporated herein by reference.

C. Rule 2.3 – Financial Statement

SDG&E's financial statement, balance sheet and income statement for the six-month period ending June 30, 2013 are included with this Application as Appendix G.

D. Rule 2.4 - CEQA Compliance

GO 131-D, Section IX.B.1.e. requires an applicant for a PTC to include in its application “[a] PEA or equivalent information on the environmental impact of the project in accordance with the provisions of CEQA and this Commission’s Rules of Practice and Procedure”. SDG&E has prepared a PEA describing in detail the environmental setting and the potential impacts associated with the construction and operation of the Proposed Project. SDG&E is simultaneously submitting the PEA portion of this application as Volume II of II.

E. Rule 2.5 – Fees for Recovery of Cost in Preparing EIR

SDG&E is submitting a deposit concurrently with this application to be applied to the cost the Commission incurs to prepare a negative declaration or an environmental impact report for the Proposed Project.

F. Rule 3.1(a) – (i) – Construction or Extension of Facilities

Rule 2.1(d) requires all applications to comply with “[s]uch additional information as may be required by the Commission in a particular proceeding.” Commission Rule 3.1 contains some additional requirements for applicants for PTCs. Some of the requirements of Rule 3.1 are duplicative of the requirements of GO 131-D, which are more precisely identified and discussed in Section V *infra*. In accordance with Rule 3.1(a) – (i) of the Commission’s Rules of Practice and Procedure, SDG&E provides the following information.

1. Rule 3.1(a) – Description of the Proposed Project

Commission Rule 3.1(a) requires applicants for a PTC to include in their applications “A full description of the proposed construction or extension, and the manner in which the same will be constructed.”

Please refer to SDG&E’s response in Section III-C *supra* of this application.

2. Rule 3.1(b) – Competing Utilities

Commission Rule 3.1(b) requires applicants for a PTC to include in their applications “The names and addresses of all utilities, corporations, persons or other entities, whether publicly or privately operated, with which the proposed construction is likely to compete, and of the cities or counties within which service will be rendered in the exercise of the requested certificate.”

The Proposed Project will be built entirely within the service territory of SDG&E, and is not intended to compete with the projects of any other entity. The requested certification is to enhance electric service within SDG&E's service territory (which consists of San Diego County and a portion of southern Orange County, including the Cities of Carlsbad, Chula Vista, Coronado, Dana Point, Del Mar, El Cajon, Encinitas, Escondido, Imperial Beach, Laguna Beach, Laguna Hills, Laguna Niguel, La Mesa, Lemon Grove, Mission Viejo, National City, Oceanside, Poway, San Clemente, San Diego, San Juan Capistrano, San Marcos, Santee, Solana Beach and Vista) and in the area served by the CAISO.

3. Rule 3.1(c) – Project Maps

Commission Rule 3.1(c) requires an applicant for a PTC to include in its application “A map of suitable scale showing the location or route of the proposed construction or extension, and its relation to other public utilities, corporations, persons, or entities with which the same is likely to compete.”

As stated in the previous response, the Proposed Projects are not intended to compete with the projects of any other entity. A map of the Proposed Projects is contained in Appendix J. Additional maps showing the location or route under consideration for the projects and are included in the PEA, Volume II of this Application.

4. Rule 3.1(d) – Required Permits

Commission Rule 3.1(d) requires an applicant for a PTC to include in its application “A statement identifying the franchises and such health and safety permits as the appropriate public authorities have required or may require for the proposed construction or extension.”

A list of the franchises and anticipated health and safety permits required for the Proposed Project is found in the PEA, Volume II of this application.

5. Rule 3.1(e) – Public Convenience and Necessity

Commission Rule 3.1(e) requires an applicant for a PTC to include in its application “Facts showing that public convenience and necessity require, or will require, the proposed construction or extension, and its operation.”

The above requirements notwithstanding, pursuant to GO 131-D, Section IX.B.1.f., an application for a PTC need not include a detailed analysis of purpose and necessity beyond that required for CEQA compliance. Nonetheless, please refer to Section III.B of this Application and the PEA, Volume II of this Application.

6. Rule 3.1(f) – Estimated Cost

Commission Rule 3.1(f) requires an applicant for a PTC to include in its application “A statement detailing the estimated cost of the proposed construction or extension and the estimated annual costs, both fixed and operating associated therewith.”

The above requirements notwithstanding, pursuant to GO 131-D, Section IX.B.1.f., an application for a PTC need not include a detailed estimate of cost beyond that required for CEQA compliance. SDG&E provides an estimated cost range for the proposed scope of the projects in Appendix I.

7. Rule 3.1(g) – Financial Ability

Commission Rule 3.1(g) requires an applicant for a PTC to include in its application “Statements or exhibits showing the financial ability of the applicant to render the proposed service together with information regarding the manner in which applicant proposes to finance the cost of the proposed construction or extension.”

The above requirements notwithstanding, pursuant to GO 131-D, Section IX.B.1.f., an application for a PTC need not include a detailed economic analysis beyond that required for CEQA compliance. In any event, SDG&E plans to own 100 percent of the assets that will comprise the Project and those assets will be added to SDG&E's utility rate base. At present, SDG&E intends to finance the Project cost with the same proportions of debt and equity with which all other rate base assets are financed, in keeping with the capital structure approved by the Commission for SDG&E. Financing would be in the form of retained earnings, available cash and debt, as necessary.

8. Rule 3.1(h) – Proposed Rates

Commission Rule 3.1(h) requires an application for a PTC to include “A statement of the proposed rates to be charged for service to be rendered by means of such construction or extension.”

SDG&E's retail rates are found in its currently-effective tariffs approved by this Commission. SDG&E's transmission rates are formula rates subject to annual adjustment, as approved by the Federal Energy Regulatory Commission (FERC). SDG&E is not proposing to increase rates as a result of this Project. A statement of all of SDG&E's presently effective electric rates can be viewed electronically by accessing: <http://www.sdge.com/regulatory/currentEffectiveTariffs.shtml>.

9. Rule 3.1(i) – Proxy Statement

Commission Rule 3.1(i) requires an applicant for a PTC to include in its application “a copy of the latest proxy statement sent to stockholders by it or its parent company containing the information required by the rules of the SEC if not previously filed with the Commission.”

A copy of SDG&E's most recent proxy statement, dated April 25, 2013, as sent to all shareholders of SDG&E's Parent Company, Sempra Energy, was mailed to the California Public Utilities Commission on April 30, 2013, and is incorporated herein by reference.

V. INFORMATION REQUIRED BY GENERAL ORDER 131-D

GO 131-D, Sections IX., X. and XI., adopted by the Commission in D.94-06-014 as modified by D.95-08-038, requires an applicant for a PTC to include in its application a variety of information. This information follows in the order in which it is listed in GO 131-D.

A. Section IX.A.B.

In accordance with Section IX.A.B.1.(a) – (f) of the Commission's GO 131-D, SDG&E provides the following information.

1. Section IX.B.1.a. - Description of the Proposed Project facilities

See the PEA, Volume II of this application.

2. Section IX.B.1.b. - Map of Proposed power line route or substation location

See Appendix J and the relevant portions of the POD, Volume II of this application.

3. Section IX.B.1.c. - Reasons for adoption of the power line route or substation locations selected

See the PEA, Volume II of this application.

4. Section IX.B.1.d. - Listing of governmental agencies consulted and statements of position

A Listing of governmental agencies consulted and statements of position is contained in Appendix H.

5. Section IX.B.1.e. – Proponent’s Environmental Assessment

The PEA attached to this application as Volume II includes the information described in Section IV(a)-(d) above and concludes that the Proposed Project will have no significant unmitigable impact on the environment.

B. Section X.A.

GO 131-D, Section X.A. requires an applicant for a PTC to “describe the measures taken or proposed by the utility to reduce the potential exposure to electric and magnetic fields generated by the proposed facilities, in compliance with Commission order.”

A copy of SDG&E’s Magnetic Field Management Plan is attached to this application as Appendix F.

C. Section XI.A.

GO 131-D, Section XI.A. requires an applicant for a PTC to notify the public of its filing “within ten days of filing the application” in several different ways, by direct mail, by advertisement and by posting.

In compliance with Section XI.A. of GO 131-D, SDG&E will, within ten days after the filing of this Application, provide proper notice of the filing of this Application: (1) by direct mail to certain public agencies and legislative bodies; (2) by advertisement in a newspaper or newspapers of general circulation in each county in which the Proposed Project will be located; and (3) by posting a notice on-site and off-site at the project location. A copy of the Draft Notice of Application for a Permit to Construct is attached to this application as Appendix B. The Service List and Public Review Locations for Notice of Application are contained in Appendix C. A List of Newspaper(s) Publishing the Notice of Application is contained in Appendix D. And, a

Draft Declaration of Posting of Notice of Application is attached to this application as Appendix E.

VI. LIST OF APPENDICES AND ATTACHMENTS

Appendix A Proposed Construction Schedule

VII. CONCLUSION

Wherefore, SDG&E requests that the Commission (1) accept its application as complete; (2) prepare an appropriate CEQA document regarding the potential environmental impacts of the Proposed Project; and (3) issue an expedited *ex parte* decision granting SDG&E a Permit to Construct the Salt Creek Substation Project, as described in this application and the supporting documents.

DATED this 25th day of September 2013, at San Diego, California.

Respectfully submitted,

SAN DIEGO GAS & ELECTRIC COMPANY

VIII. VERIFICATION

David L. Geier declares the following:

I am an officer of San Diego Gas & Electric Company and am authorized to make this Verification on its behalf. I am informed and believe that the matters stated in the foregoing **APPLICATION OF SAN DIEGO GAS & ELECTRIC COMPANY (U 902 E) FOR A PERMIT TO CONSTRUCT THE SALT CREEK SUBSTATION PROJECT** are true to my own knowledge, except as to matters which are therein stated on information and belief, and as to those matters I believe them to be true.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed this 25th day of September 2013, at San Diego, California.

APPENDIX B
Draft Notice of Application

NOTICE OF APPLICATION FOR A PERMIT TO CONSTRUCT

San Diego Gas & Electric Salt Creek Substation Project

Date: September XX, 2013

CPUC Application No.: 13-09-XXX

Proposed Project: San Diego Gas & Electric Company (SDG&E) has filed an application with the California Public Utilities Commission (CPUC) for a Permit to Construct the Salt Creek Substation Project (Proposed Project). As proposed by SDG&E, and further described in the Proponent's Environmental Assessment (PEA), the Proposed Project includes the following elements:

- 120 MVA 69/12kV distribution substation
- Loop-in existing TL6910 and construct a new 69kV power line.

The Proposed Project is needed to serve foreseeable future development and load growth in the eastern portion of the City of Chula Vista and southwestern San Diego.

Environmental Assessment: SDG&E has prepared a PEA that includes the analysis of potential environmental impacts created by the construction and operation of the proposed substation and associated facilities. The PEA concludes there are no unmitigable environmental impacts to the area as a result of the Proposed Project.

Electric Magnetic Field (EMF) Management: SDG&E will employ measures to reduce public exposure to EMF in accordance with CPUC Decisions 93-11-013 and 06-01-042 and SDG&E's "EMF Design Guidelines for Transmission, Distribution, and Substation Facilities." SDG&E has filed copies of its Magnetic Field Management Plan for this Proposed Project as part of its Application.

Public Review Process: SDG&E has applied to the California Public Utilities Commission (CPUC) for a Permit to Construct and has asked for approval without hearings. Pursuant to the CPUC's General Order 131-D, Section XII and Rules of Practice and Procedures, Rule 2.6(a), within 30 calendar days of the date notice was first mailed or published, you may protest and request that the CPUC hold hearings on this Amended Application. If the CPUC, as a result of its investigation, determines that public hearings should be held, notice shall be sent to each person or entity who is entitled to notice or who has requested a hearing. Please contact the following people should you require any information regarding this project.

Allen K. Trial Attorney for SDG&E 101 Ash Street, HQ12 San Diego, CA 92101	AND	Jennifer Pierce SDG&E Regulatory Affairs 8330 Century Park Court, CP 32D San Diego, CA 92123	AND	Director, Energy Division California Public Utilities Commission 505 Van Ness Avenue San Francisco, CA 94102
---	-----	--	-----	--

CPUC PROCESS

If you would like additional information on the CPUC process or would like to attend hearings (if held) and need assistance, you can contact the Public Advisor's Office (PAO). You may also send your comments to the PAO at the following address: Public Advisor's Office, 320 West 4th St., Ste. 500, Los Angeles CA 90013 or send an e-mail to: public.advisor.la@cpuc.ca.gov. Any letters received from you will be circulated to each Commissioner and will become part of the formal correspondence file in the application. In your letter state that your comments are regarding Application No. A.13-09-XXX.

FOR FURTHER INFORMATION

You may request additional information or obtain a copy of the application and related exhibits by writing to: Jennifer Pierce, Regulatory Case Administrator for SDG&E, 8330 Century Park Court, San Diego, CA 92123. SDG&E will provide a copy of the application, including the public testimony, upon request.

SDG&E's application and attachments may be inspected at the CPUC's Central Files Office, 505 Van Ness Ave., San Francisco, CA 94102. A copy of the application and any amendments may be inspected at the SDG&E business offices listed below:

Draft Declaration of Posting of Notice

DECLARATION OF POSTING (DRAFT)

I, _____, am the Project Manager responsible for overseeing various aspects of substation, transmission, and distribution projects for San Diego Gas & Electric Company. On _____, 2013, I posted along the project site for the proposed San Diego Gas & Electric Company's Salt Creek Substation Project with the Notice of Filing of an Application for a Permit to Construct filed with the California Public Utilities Commission, in accordance with the provisions of General Order 131-D, Section XI.A.3.

I declare under penalty of perjury that the foregoing statements are true and correct to the best of my knowledge.

Executed this ____ day of ____, 2013, at San Diego, California.

Trinnon Myers
Project Manager
Representative, SDG&E

I. Proposed Project Scope

The “Salt Creek Substation Project” (Proposed Project) is to develop a 120 MVA 69/12kV distribution substation, loop-in existing power line, tieline (TL) TL 6910¹ and construct a new five-mile-long 69 kV power line, TL 6965, from Miguel Substation to the new substation, in order to serve future development and load growth in the eastern portion of the City of Chula Vista in southwestern San Diego County. The proposed substation site and the majority of the proposed power line are located in the eastern portion of City of Chula Vista, near State Route 125 (SR-125). Approximately 4,700 linear feet of the northern most portion of the new 69 kV power line is located in the unincorporated portion of San Diego County on SDG&E fee- owned undeveloped land surrounding the Miguel Substation. The majority of the Proposed Project is located east of SR-125, in the southwesterly portion of San Diego County. Approximately 6,100 linear feet of the proposed power line is located on the west side of SR-125 with two overhead crossings over SR-125. The Proposed Project substation site is approximately 15 miles southeast of Downtown San Diego and 5 miles north of the international border with Mexico. (see “Appendix 1-Segment Map”)

The eastern portion of the City of Chula Vista is a rapidly growing area that includes the developing communities of Otay Ranch, Eastlake, and approximately 5,000 acres of undeveloped land. A study of the area was done and concluded that in addition to building out and adding planned substation bank additions at the two existing distribution substations serving eastern Chula Vista (Proctor Valley and Telegraph Canyon Substations), a new distribution substation would be required to serve an ultimate residential and commercial area load of 107 MW. The new substation would add needed capacity and substation/circuit reliability to the area.

The Proposed Project would be constructed within the existing SDG&E utility corridor or rights-of-way (ROW) throughout the entire scope. This “Detailed Magnetic Field Management Plan (FMP)” is for analysis of three primary components of the Proposed Project:

- Construction of a 120 MVA 69/12 kV low profile Salt Creek Substation southeasterly of Hunte Parkway;
- Construction of a new 69 kV power line (TL 6965) from the existing Miguel Substation to the proposed Salt Creek Substation;
- Construction of a 69 kV power line loop-in (TL 6910) to the Salt Creek Substation;

For purposes of this FMP, the term “Proposed Project” does not include the distribution lines, per the SDG&E “EMF² Design Guidelines for Electrical Facilities” which states, “For distribution facilities, utilities would apply no-cost and low-cost measures by integrating reduction measures into construction and design standards, rather than evaluating no-cost and low-cost measures for each project.”

¹ In accordance with CPUC General Order 131-D, the term "power line" is used in this document in reference to 69 kV tielines. The term "transmission," when used, refers to internal SDG&E operating departments, internal SDG&E standards and/or other guidelines, existing electric lines energized at or above 200 kV, or existing gas transmission pipelines. It is not intended to suggest that the 69 kV tielines in this Proposed Project are designed for immediate or eventual operation at 200 kV or above.

² EMF refers to electric and magnetic fields.

II. Magnetic Field Management Design Guidelines

The CPUC requires SDG&E apply its *EMF Design Guidelines for Electrical Facilities* (“Guidelines”) to all new electric transmission projects to reduce public exposure to magnetic fields. SDG&E filed its Guidelines with the CPUC in accordance with CPUC Decision 93-11-013 and updated them in accordance with the 2006 CPUC Decision 06-01-042.

Consistent with SDG&E’s Guidelines and with the CPUC order, magnetic fields and possible magnetic field management measures were evaluated along the power line locations associated with the Proposed Project. The results of this evaluation are contained in this FMP.

The FMP deals solely with magnetic fields. Moreover, reducing the magnetic field strength is but one of many factors to be considered in planning and designing a transmission system, along with other issues such as safety, environmental concerns, reliability, insulation and electrical clearance requirements, aesthetics, cost, operations and maintenance.

III. Methodology

In Decision 06-01-042, the CPUC notes that modeling is used to compare the relative effectiveness of field-reduction options and is not to be used to predict post-construction field levels. CPUC Decision 06-01-042, Finding of Fact 14: “Utility modeling methodology is intended to compare differences between alternative EMF [Electromagnetic Field] mitigation measures and not determine actual EMF amounts.”³ The CPUC also notes that “modeling indicates relative differences in magnetic field reductions between different transmission line construction methods, but does not measure actual environmental magnetic fields.”⁴

In accordance with its Guidelines, SDG&E would take the following measures for the Proposed Project:

- Apply SDG&E’s EMF Guidelines for transmission circuit facilities to the Proposed Project design.
- Identify and implement appropriate “no-cost” measures, i.e., those that will not increase overall project costs but will reduce the magnetic field levels.
- Identify and implement appropriate “low-cost” measures, i.e., those measures costing in the range of 4% of the total budgeted project cost that will reduce the magnetic field levels by 15% or more at the edge of the right-of-way (ROW).
- When a sufficiency of “low-cost” measures is available to reduce magnetic field levels, such that it is difficult to stay within the 4% cost guideline, apply these “low-cost” measures by priority, per the Guidelines.

The 15% minimum reduction required for low-cost measures is in addition to any field reduction due to “no-cost” measures. It is not cumulative.

Since the Proposed Project requires permitting under General Order 131-D, a Detailed Field Management Plan (FMP) will be used. The Detailed FMP consists of a project description, a

³ CPUC Decision D.06-01-042, Finding of Fact 14, p. 20.

⁴ Ibid, p.11.

checklist table showing evaluation of magnetic field reduction measures adopted or rejected per transmission line, evaluation of “no-cost” and “low-cost” magnetic field reduction measures, magnetic field models where multiple lines are involved within the same easement or ROW, and a summary with recommendations.

Field levels were calculated using the RESICALC program developed and maintained by the Electric Power Research Institute. As the in-service date of the Proposed Project would be March 2016 the projected high usage currents, “2016 heavy summer,” were used in the calculations. For the purpose of evaluating the field management measures, magnetic field levels were calculated and compared at a height of one meter above ground.

To evaluate the effectiveness of various magnetic field reduction measures, calculated values for a given measure were compared to calculated values without the measure. Since all power lines of the Proposed Project are within SDG&E-fee-owned undeveloped land, or the Miguel – Mexico utility corridor, magnetic field levels were calculated and compared at the adjacent parallel edges-of-ROW. Modeling for this Proposed Project included Segment 2, the utility corridor, since the other Segments were well within undeveloped land owned by SDG&E.

The edges-of -ROW are identified as “west”, “east”, “north”, or “south” for consistency when reviewing the sketches included in “Appendix 1” and the tables included in “Section VIII-Summary of Calculated Magnetic Field Levels for the Power Line Portion of the Proposed Project” in this report.

IV. Project Description

The “Salt Creek Substation Project” (Proposed Project) substation site is located adjacent to, and southeasterly of, Hunte Parkway where SDG&E’s Miguel-Mexico utility corridor crosses Hunte Parkway. The Project site consists of 11.6 acres of undeveloped land. The site is bordered by Hunte Parkway to the northwest, SDG&E’s Miguel to Mexico utility corridor and open space to the east, and undeveloped land to the south and southwest. The 120-foot wide SDG&E utility corridor contains overhead electric power line, TL 6910, and overhead transmission lines, TL23041 and TL 23042; a 36-inch high pressure gas transmission pipeline (SDG&E pipeline 3010), a four-inch high pressure gas line, San Diego County Water Authority (SDCWA) 69-inch water pipeline, and a SDCWA 72-inch water pipeline. Other surrounding land uses include existing residences located north of Hunte Parkway and undeveloped land to the south and southwest which is proposed for future development. The Proposed Project is situated approximately 15 miles southeast of Downtown San Diego and 5 miles north of the international border with Mexico.

An approximately five (5) mile long overhead 69 kV power line (TL 6965) would be constructed from the existing Miguel Substation extending southerly to the proposed Salt Creek Substation. The northernmost 4,700 linear feet would be located in the unincorporated portion of San Diego County on SDG&E fee-owned undeveloped land surrounding the existing Miguel Substation. Approximately 6,100 linear feet of the proposed power line would be located on the west side of SR-125 with two overhead crossings over SR-125. The remainder of the power line would be constructed within SDG&E’s existing 120-foot-wide utility corridor within the City of Chula Vista where it would terminate on a new cable pole located approximately 1,200 feet southeast of Hunte Parkway. The new TL 6965 would then transition from overhead to underground at this

cable pole and traverse underground in a northwesterly direction approximately 1,000 feet within an SDG&E get-away into the new substation. (see “Appendix 1-Segment Map”)

TL 6910 is an existing 69 kV circuit with terminal points at SDG&E’s Miguel and Border Substations. As part of the Proposed Project, SDG&E would open TL 6910 by installing two new steel cable poles, intercept and loop the power line underground via two new 69 kV duct packages in separate trench alignments from the existing corridor into the proposed Salt Creek Substation on SDG&E fee-owned property, a distance of approximately 300 feet. TL 6910 would then be re-configured as TL 6910 (Border-Salt Creek Substation) and TL 6964 (Miguel – Salt Creek Substation). (see “Appendix 1-Segment Map”)

As previously stated, the Proposed Project would be constructed within the existing SDG&E 120 foot wide utility corridor or ROW and/or on SDG&E fee- owned undeveloped land. This Detailed FMP is for analysis of three primary components of the Proposed Project:

- **Salt Creek Substation** - The proposed Salt Creek Substation would be a distribution substation located adjacent to and southeast of Hunte Parkway, where SDG&E’s Miguel-Mexico Transmission Corridor crosses Hunte Parkway. The proposed site consists of 11.64 acres of undeveloped land. (see “Appendix 1-Segment Map” and “Section IX: Simplified Field Management Plan Checklist for the Salt Creek Substation portion of the proposed Project”)
- **New 69 kV TL 6965** - A new overhead 69kV power line, approximately 5 miles long, would be constructed from the existing Miguel Substation extending southerly to the proposed Salt Creek Substation. The northernmost 4,700 linear feet would be located on SDG&E’s fee-owned property in an unincorporated portion of San Diego County. (see “Appendix 1- Segment Map_Segment 1”) The remainder of the overhead power line would be constructed within SDG&E’s existing 120-foot-wide transmission corridor and 15 feet west of the south ROW. It would terminate on a new cable pole located approximately 1,200 feet southeast of Hunte Parkway County. (see “Appendix 1-Segment Map_Segment 2”) At that point it would extend underground within SDG&E owned undeveloped land to the proposed Salt Creek Substation. (see “Appendix 1-Segment Map_Segment 3”)

Existing structures and conductors along a portion of TL 643, which are located on SDG&E fee-owned Miguel Substation property, would be utilized to complete the TL 6965 connection to Miguel Substation. This includes eight poles along TL 643, of which two poles would require pole-top work to connect TL 6965 to them. The remaining six poles would not require additional work. . (see “Appendix 1-Segment Map_Segment 1”)

Currently, there are three overhead electric power and transmission line circuits located in the utility corridor between the Miguel Substation and the proposed Salt Creek Substation. Existing power line, TL 6910, is located on a combination of wood and steel poles along the west side of the 120-foot-wide transmission corridor connecting Miguel Substation to Border Substation in Otay Mesa. Existing transmission line circuits, TL 23041 and TL 23042, are located on double circuit steel lattice towers along the centerline of the corridor, connecting Miguel Substation to SDG&E’s Otay Mesa switchyard in Otay Mesa. (see “Appendix 1-Segment Map”)

TL 6965 would use approximately forty-nine (49) poles, including eight (8) existing poles⁵. A total of approximately forty-one (41) new galvanized steel power poles would be erected for the new 69 kV power line. Direct bury galvanized steel poles would be used for tangent structures where the power line is generally straight, and engineered poles would be used for heavy angles and freeway crossings. An engineered cable pole is required where the power line transitions from overhead to underground. The new TL 6965 poles, consist of the following:

- Twenty-nine (29) direct bury galvanized steel poles (including one two-pole H frame structure);
- Eleven (11) galvanized engineered foundation poles; and
- One (1) engineered foundation cable pole.

These structures would have an average height above ground (HAG) of approximately 68 feet, and would range in height from approximately 34 feet to 123 feet. At the proposed Salt Creek Substation, one approximately 103-foot-high cable pole would be erected to transition the line from overhead to underground.

The final approximately 1,000-foot segment of TL 6965 power line would be installed underground in a concrete encased duct bank, at the standard depth of 3.0 feet below grade to top-of-duct package, from the cable pole to the Salt Creek Substation rack for the new underground connection, all well within SDG&E owned property.

- **TL 6910 Loop-In** - TL 6910 is an existing 69 kV circuit with terminal points at SDG&E's Miguel and Border Substations. Border Substation is located on Otay Mesa in the City of San Diego. As part of the Proposed Project, SDG&E would open TL 6910 by installing two new steel cable poles (approximately 83 feet in height) near the proposed Salt Creek Substation, and loop the power line underground via two new 69 kV duct packages in two separate 300-foot trench alignments, originating at the existing transmission corridor and extending, within SDG&E fee-owned property, into the proposed Salt Creek Substation. The 69 kV concrete encased duct packages would have a standard depth of 3.0 feet below grade to top-of-duct package. TL 6910 would then be re-configured as **TL 6910 (Border-Salt Creek Substation)** and **TL 6964 (Miguel – Salt Creek Substation)**. The existing overhead poles and circuit wires would remain as is.

⁵ The eight existing poles are part of the TL643.

Drawings and descriptions showing a typical pole top configuration, tieline relative locations to each other and left (west) and right (east) ROW are included in Appendix 1. Figure 1 below shows typical drawing symbols where applicable to a Project; the arrows on the drawings indicate the viewing direction for orienting each drawing and the direction of current flow.

Figure 1: Drawing Symbol Definitions

Symbol	Interpretation	Meaning
	Viewing Direction	The orientation as seen when looking toward the north
	Current flow into the page	Direction of current flow is same as viewing direction
	Current flow out of the page	Direction of current flow is opposite of viewing direction
	Underground Transmission Circuit	Location of underground transmission circuit
	Underground Transmission Circuit	Location of Underground Transmission in Bridge Cell

V. Field Management Measures Considered

Per the “EMF Design Guidelines for Electrical Facilities, Table 3-1”, all portions of the power lines, TL 6965, and re-named portion of TL 6910, TL 6964, within scope of the Proposed Project were reviewed for suitable application of magnetic field reduction measures, as listed in “*Table 1: Magnetic Field Reduction Measures Adopted or Rejected*” below. These measures will be discussed under the “Section VI- Magnetic Field Reduction Measures Evaluated for the Project” that follows.

Table 1: Magnetic Field Reduction Measures Adopted or Rejected

Segment(s)	Location (Street, Area)	Adjacent Land Use	Reduction Measure Considered	Measure Adopted? (Yes/No)	Estimated Cost to Adopt
1, 2, 3	SDGE fee-owned undeveloped land, Utility Corridor	Residential, Undeveloped	Locate power lines closer to center of the utility corridor to extent possible.	No	N/A
	<p><u>Reasons not adopted:</u></p> <p><u>Segment 1</u> - is utilizing existing pole structures and is well within SDG&E fee-owned undeveloped land. Relocating circuits in Segment 1 would not be a “no-cost” option, but a “low-cost” option. “Low-cost” mitigation measures are not applicable when alignment is within land considered to be “undeveloped”.</p> <p><u>Segment 2</u> - Due to the two 230 kV transmission lines in center of the utility corridor, the alignment of TL 6965 would be 15 ft. west of the east ROW which is as close to center of the transmission corridor as possible for safety reasons. Existing TL 6910 and its re-named portion, TL 6964, are on existing poles 15 ft. east of the west ROW which is also as close to center of easement as possible. The spacing is needed in this high wind area for safety in case of blow-out during high wind conditions.</p> <p><u>Segment 3</u> – is the getaway underground Segment with underground duct banks well within SDG&E fee-owned undeveloped property. Relocating circuits in Segment 3 would not be a “no-cost” option, but a “low-cost” option. “Low-cost” mitigation measures are not applicable when alignment is within land considered to be “undeveloped”.</p>				
1, 2	SDGE fee-owned undeveloped land, Utility Corridor	Residential, Undeveloped	Increasing structure height	No	N/A
	<p><u>Reasons not adopted:</u></p> <p><u>Segment 1</u> – SDG&E-fee-owned undeveloped land portion of TL 6965 overhead would primarily be share poles with existing TL 643. New poles needed in this Segment would be of similar height. Increased height of the new poles would be a “low-cost” option. “Low-cost” mitigation measures are not applicable when alignment is within land considered to be “undeveloped”.</p> <p><u>Segment 2</u> - includes the utility corridor where TL 6964, TL 23042, TL 23041, and new TL 6965 would reside. SDG&E Standards for 69kV single circuit overhead transmission lines with no distribution underbuild, require minimum sag height of 30 feet from lowest circuit wire to ground as per <i>GO-95 Design Standards</i>. Through modeling, using various heights for lowest sag of new TL 6965, it was found by raising the sag height from the initial 30 feet from lowest circuit wire to ground, to as much as 120 additional feet still would not provide a 15% reduction at either east or west ROW for a “low-cost” mitigation option. To provide that height of sag between lowest circuit wire to ground, pole heights must be over 150 feet high which would be unreasonable and impose safety and maintenance concerns for SDG&E, and possible visual and/or aesthetic concerns for the area.</p>				

	<p><u>Segment 3</u> – includes underground in undeveloped land. “Low-cost” mitigation measures are not applicable when alignment is within land considered to be “undeveloped”.</p>
--	---

Segment(s)	Location (Street, Area)	Adjacent Land Use	Reduction Measure Considered	Measure Adopted? (Yes/No)	Estimated Cost to Adopt
1, 2, 3	SDGE fee-owned undeveloped land, Utility Corridor	Residential, Undeveloped	Reduce conductor (phase) spacing.	No	N/A
	<p><u>Reasons not adopted:</u></p> <p><u>Segment 1</u> – TL 6965 would primarily share poles with existing TL 643 in a double circuit configuration. New poles needed in this Segment would be of similar height and conductor spacing the existing pole top configuration is per “<i>SDG&E Electric Transmission Standards</i>” for 69 kV, which provides optimum magnetic field reduction at edge-of-ROW.</p> <p><u>Segment 2</u> - The new steel poles in the Proposed Project for TL 6965 would comply with “<i>SDG&E Electric Transmission Standards</i>” for 69 kV -WPI pole top configurations which provide optimum magnetic field reduction. There are no alternative poletop configurations to be considered for this Project. The existing power and transmission lines within the utility corridor (TL 6964, TL 23042, TL 23041) would remain on existing poles with existing pole top configuration. Modifications to their existing conductor phase spacing is out of scope of the Proposed Project.</p> <p><u>Segment 3</u> – The underground portion of the Proposed Project would use “<i>SDG&E Electric Transmission Standards</i>” for underground phase spacing. Therefore this option was rejected.</p>				
2	SDG&E fee-owned undeveloped land, Utility Corridor	Residential, Undeveloped	Phasing Circuits to Reduce Magnetic Fields	Yes	\$6K
	<p><u>Segment 2</u> – was modeled with current phasing for TL 6964, TL23042, and TL23041 and various configurations for TL 6965. Modeling showed the initial design phase for TL 6965, A-B-C (top-to-bottom) provided lowest magnetic fields at the east ROW, without increasing fields at the west ROW. (see section “VIII. Summary of Calculated Magnetic Field Levels for the Power Line Portion of the Proposed Project” below)</p> <p>Since the portion of TL 6910 from Miguel to Salt Creek Substation being re-named TL 6964 is looping in to Salt Creek Substation, modeling was performed with various phase configurations for that portion of the circuit. Models showed if the phase of TL 6964 was changed from A-B-C (top-to-bottom) to C-B-A (top-to bottom) a reduction in magnetic fields of 22.1% was achieved at the west ROW, with no increase in magnetic fields at the east ROW. (see section “VIII. Summary of Calculated Magnetic Field Levels for the Power Line Portion of the Proposed Project” below)</p> <p>This phase configuration should be adopted as a “low-cost” option since the existing circuit wires at Miguel Substation from the rack to first pole structure would need to be rolled to provide this phase the full length to the rack at Salt Creek Substation.</p>				

Segment(s)	Location (Street, Area)	Adjacent Land Use	Reduction Measure Considered	Measure Adopted? (Yes/No)	Estimated Cost to Adopt
1, 3	SDG&E fee-owned undeveloped land, Utility Corridor	Residential, Undeveloped	Phasing Circuits to Reduce Magnetic Fields	No	N/A
	<p>Reasons not adopted: <u>Segment 1</u> – is utilizing existing pole structures and is well within SDG&E fee-owned undeveloped property. TL 6965 would primarily share poles with existing TL 643 in a double circuit configuration. The length of this Segment is 0.9 miles of the 5.0 mile total Project length. TL 6965 should be phased the same from Miguel Substation to Salt Creek Substation with the phase providing optimal magnetic field reduction at edge-of-ROW near the residential area of the Proposed Project, Segment 2. <u>Segment 3</u> – consists of three (3) single circuit underground duct banks (TL 6965, TL 6964, and TL 6910) taking various paths well within SDG&E owned undeveloped property. Changing phase of a single circuit in a duct bank will not reduce magnetic fields. The remaining portion of TL 6910 leaving Salt Creek Substation continues on to Border Substation. Modeling that portion was not performed since it is out of scope of this Proposed Project. Therefore for Segments 1 and 3, this field reduction method was rejected.</p>				
1, 2	SDG&E fee-owned undeveloped land, Utility Corridor	Residential, Undeveloped	Placing Overhead Underground	No	N/A
	<p>Reasons not adopted: <u>Segment 1</u>- is utilizing existing pole structures and is well within SDG&E fee-owned undeveloped land. Any underground consideration would be a “low-cost” option which is not applicable to undeveloped land use areas. <u>Segment 2</u> – is within the utility corridor which contains existing overhead power and transmission lines, SDG&E 36-inch high pressure gas transmission pipeline, a 4-inch high pressure gas line, and San Diego County Water Authority (SDCWA) 69-inch and 72-inch water pipelines. Due to these existing utilities, there is no alignment within the 120 foot ROW for an additional underground utility to be installed and still maintain clearance from the other utilities. In addition, modeling showed the standard depth of 3 feet top-of-conduit would only provide 3% reduction in magnetic fields at ROW. An additional 50 foot depth would be required to reach the 15% reduction at the east ROW. This would not only be unreasonable and impose safety and maintenance concerns for SDG&E, but it would degrade the ampacity rating of the circuit below the required ratings for the Project. For these reasons, undergrounding as a "low-cost" field reduction measure was not adopted.</p>				
1, 2, 3	SDG&E fee-owned undeveloped land, Utility Corridor	Residential, Undeveloped	Increase trench depth	No	N/A
	<p>Reasons not adopted: <u>Segment 1 & Segment 3</u>- The proposed and existing power line alignments are well within SDG&E fee-owned undeveloped land. Any underground consideration would be a “low-cost” option which is not applicable to undeveloped land use areas. <u>Segment 2</u> - Undergrounding the proposed 69 kV tieline, TL 6965 not adopted. (see “Placing overhead underground” above in this table). Therefore increasing trench depth as a reduction measure was rejected for Segment 2.</p>				

VI. Magnetic Field Reduction Measures Evaluated for the Power Line Portion of the Project

Per SDG&E's Guidelines this FMP is limited to an assessment of "phasing circuits to reduce magnetic fields" as a field reduction measure. Other measures such as locating power lines closer to the center of the easement, increasing structure height, reducing conductor (phase) spacing, placing overhead underground to reduce magnetic fields, and increasing trench depth were not implemented.

Locating power lines closer to the center of the easement: The alignment of new TL 6965 within the utility corridor (Segment 2) is as close to center of easement as possible for safety reasons. Since this is considered a high wind area, the spacing is needed in case of blow-out during high wind conditions. Alignment of TL 6965 in Segment 1 and the underground portion in Segment 3 is well within SDG&E-fee-owned undeveloped land and a "low-cost" mitigation such as this is not required over property defined as "undeveloped land". Therefore locating power lines closer to center of easement was discarded as a reduction measure.

Increasing structure height: Increasing the structure height only pertains to the new power line, TL 6965. All other power lines within scope of this project are to remain on existing poles. As Segment 2 was the longest and primary Segment to be considered for this reduction measure, and has residential homes nearby, modeling was performed using 30 feet from lowest circuit wire to ground as defined in *GO-95 Clearance Rules* as the baseline. Due to the Miguel- Mexico utility corridor having existing transmission lines, TL 23041 and TL 23042, on centerline providing a primary source of power from nearby Otay Power Plant to the SDG&E power grid, modifying sag height of TL 6965 to reduce magnetic fields did not approach the 15% reduction for "low-cost" mitigation at the east edge-of- ROW until the additional height reached 150 feet, which is unreasonable and imposes safety and maintenance concerns for SDG&E, and possible visual and/or aesthetic concerns for the area. Less than 1% reduction was achieved at that height at the west edge-of-ROW. Therefore this reduction measure was discarded.

Reducing conductor (phase) spacing: The new steel poles for TL 6965 in the Proposed Project have "SDG&E Electric Transmission Standard" pole-head configurations equivalent which provide optimum magnetic field reduction. There are no alternative poletop configurations to be considered for this Project. The other electric power and transmission lines within the utility corridor (TL 6964, TL 23042, TL 23041) would remain on existing poles with existing pole top configuration. Modifications to their existing conductor phase spacing is out of scope of the Proposed Project. Therefore this reduction measure was rejected.

Phasing Circuits to Reduce Magnetic Fields: Modeling was performed for the utility corridor Segment 2 of the Proposed Project with current phasing for TL 6964, TL23042, and TL23041 and various configurations for TL 6965. Modeling showed the initial design for the Proposed Project phasing for **TL 6965, as A-B-C (top-to-bottom)** to provided lowest magnetic fields at the east ROW, without increasing fields at the west ROW. Modeling the re-named portion of TL 6910, **TL 6964**, showed if the phase was changed from **A-B-C (top-to-bottom)** to **C-B-A (top to bottom)** a reduction in magnetic fields of **22.1%** was achieved at the west ROW, with no increase in magnetic fields at the east ROW. (see section "VIII. Summary of Calculated Magnetic Field Levels for the Power Line Portion of the Proposed Project" below) . This phase configuration should be adopted as a "**low-cost**" option since the existing circuit wires at Miguel

Substation from the rack to first pole structure would need to be rolled to provide this phase the full length to the rack at Salt Creek Substation.

The remaining portion of TL 6910 leaving Salt Creek Substation continues on to Border Substation. Modeling that portion was not performed since it is out of scope of this Proposed Project.

Undergrounding to reduce magnetic fields: Segment 2 is within the utility corridor which contains existing overhead power and transmission lines, SDG&E 36-inch high pressure gas transmission pipeline, 4-inch high pressure gas line, and San Diego County Water Authority (SDCWA) 69-inch and 72-inch water pipelines. Due to these existing utilities, there is no alignment within the 120 foot wide ROW for an additional underground utility to be installed and still maintain required clearance from the other utilities. In addition, modeling underground for Segment 2 the standard depth of 3 feet top-of-conduit only provided 3% reduction in magnetic fields at edge-of-ROW. An additional 50 foot depth would be required to reach the 15% reduction at the east edge-of-ROW without increasing magnetic fields at the west edge-of-ROW. This would not only be unreasonable and impose safety and maintenance concerns for SDG&E, but it would degrade the ampacity rating of the circuit below the required ratings for the Project.

Undergrounding in Segment 1 would be a “low-cost” reduction measure, which is not applicable to undeveloped land use areas.

For these reasons, undergrounding was rejected as a "low-cost" field-reduction measure.

Increasing trench depth: Undergrounding TL 6965, in Segment 2 was discarded due to the existing underground within the ROW, and degrading the ampacity rating below the required ratings for the Project. For Segments 1 and 3, any underground consideration would be a “low-cost” option which is not applicable to undeveloped land use areas. Therefore this reduction measure was rejected.

VII. Magnetic Field Reduction Measures Recommended for the Power Line Portion of the Proposed Project

Reduction of magnetic field values by increasing structure height as a field reduction measure was adopted as a viable method to reduce magnetic fields at the edge-of-ROW for the Proposed Project. The recommended field reduction measures are:

A. “No-Cost” Field Management Measures:

There are no “no-cost” magnetic field reduction measures recommended for the Proposed Project.

B. “Low-Cost” Field Management Measures:

Modeling the re-named portion of TL 6910, **TL 6964**, showed if the phase was changed from **A-B-C (top-to-bottom)** to **C-B-A (top-to bottom)** a reduction in magnetic fields of **22.1%** was achieved at the west ROW, with no increase in magnetic fields at the east ROW. (see section “VIII. Summary of Calculated Magnetic Field Levels for the Power Line Portion of the Proposed Project” below)

This phase arrangement should be adopted as a “**low-cost**” option since the existing circuit wires at Miguel Substation from the rack to first pole structure would need to be rolled to provide this phase the full length to the rack at Salt Creek Substation.

VIII. Summary of Calculated Magnetic Field Levels for the Power Line Portion of the Proposed Project

The following tables show the initial design and recommended (“low-cost”) design magnetic field values (milligauss) and the percent change for Segment 2 of the Proposed Project. A positive percentage value shows a reduction in milligauss, while a negative value shows an increase in milligauss from the initial design. The magnetic field values were calculated at the edges-of-ROW. Since increasing structure and sag height, installing TL 6965 underground, and increasing trench depth field reduction measures were not viable reduction measures for the Proposed Project, the only modeling table included shows changes to phase arrangement that provided reduction in magnetic field values (milligauss) at edge-of-ROW for TL 6964 and TL 6965.

Table 2: Segment 2 – TL 6964 and TL 6965 Recommended Phasing

Segment 2	Phasing		
	Existing	Proposed	Percent (%)
TL 6964	A-B-C (t-b)	C-B-A (t-b)	milligauss
TL 6965	A-B-C (t-b)	A-B-C (t-b)	reduction
East ROW	22.25	22.26	0.0%
West ROW	24.89	19.38	22.1%

- Residential, Undeveloped, SDG&E fee-owned undeveloped land use.
- Length = approx. 4.1 miles
- Change Phase of **TL 6964** at Miguel and Salt Creek Substations from A-B-C (t-b) to **C-B-A (t-b)**
- Use initial design phasing for **TL 6965**, **A-B-C (t-b)**, which provided lowest milligauss values at edge-of-ROW.
- See “**Appendix 1**” attached for further detail.

IX. Simplified Field Management Plan Checklist for the Salt Creek Substation Portion of the Proposed Project

Generally, magnetic field values along the substation perimeter are low compared to the substation interior because of the distance to the energized equipment. Normally, the highest values of magnetic fields around the perimeter of a substation are caused by overhead power lines and underground duct banks entering and leaving the substation, and not by substation equipment. Therefore, the magnetic field reduction measures generally applicable to a substation project are as follows:

- Site selection for a new substation;
- Setback of substation structures and major substation equipment (such as bus, transformers, and underground cable duct banks, etc.) from perimeter;
- Field reduction for transmission lines entering and exiting the substation.

The Substation Checklist FMP evaluates the no-cost and low-cost measures considered for the substation project, the measures adopted, and reasons that certain measures were not adopted.

No.	No-Cost and Low-Cost Magnetic Field Reduction Measures Evaluated for a Substation Project	Measure Adopted? (Yes/No)	Reason(s) if not Adopted
1	Keep high current devices, transformers, capacitors, and reactors, away from the substation property lines by bringing into the substation property as much as possible.	Yes	
2	For underground duct banks, the minimum distance should be 12 feet from the adjacent property lines or to the extent practical.	Yes	
3	Locate new substations close to existing transmission line rights-of-way to the extent practical.	Yes	
4	Increase the substation property boundary to the extent practical.	Yes	
5	Other: NONE	N/A

Appendix 1 Proposed Project

Segment Map

Segment 2 – Initial Design

Approx. Location:	Overhead – within utility corridor from SDG&E-fee-owned undeveloped land, south, to SDG&E owned Salt Creek Substation
Power Lines:	TL 6964 (old TL 6910), TL 23042, TL 23041, new TL 6965
Land use:	Residential, Undeveloped
Length:	4.1 mi.
Right-of-Way Width:	120 ft.

Segment 2 – Proposed Design

Approx. Location:	Overhead - within utility corridor from SDG&E-fee-owned undeveloped land, south, to SDG&E owned Salt Creek Substation
Power Lines:	TL 6964 (old TL 6910), TL 23042, TL 23041, new TL 6965
Land use:	Residential, Undeveloped
Length:	4.1 mi.
Right-of-Way Width:	120 ft.
Change Phasing:	TL 6964 to C-B-A (t-b)

APPENDIX H
Listing of Governmental Agencies Consulted and Statements of Position

**DECLARATION OF SERVING A WRITTEN REQUEST FOR A BRIEF
POSITION STATEMENT**

I, Claudia Valenzuela, am a Public Affairs Manager responsible for managing community outreach for San Diego Gas & Electric Company. On September 24, 2013, in accordance with the provisions of General Order 131-D, Section IX.B.1.d., I made a written request for a brief position statement by the agencies listed in Appendix H concerning the proposed power line route or activities described in this Application for a Permit to Construct the San Diego Gas & Electric (SDG&E) Salt Creek Substation Project as filed with the California Public Utilities Commission. To the best of my own knowledge and belief as of the date of this declaration no agency has submitted a position statement to SDG&E.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct.

Executed this 25 day of September, 2013, at San Diego, California.

A handwritten signature in black ink, appearing to read 'C. Valenzuela', is written over a horizontal line. The signature is fluid and cursive.

SUBJECT: Letter of Support for the SDG&E Salt Creek Substation Project

The City of Chula Vista's (City) supports the development of the Salt Creek Substation ("Proposed Project"). The City anticipates that the new Proposed Project will enhance the regional system and support the upcoming projects in the area. San Diego Gas & Electric (SDG&E), the City, and other entities have been working together on the planning and design of the Proposed Project, which will serve to support the development of important projects in the Otay Ranch Community, such as the future University and Innovation District. As part of this process, SDG&E and the City have undertaken a variety of activities related to the planning of the proposed project. Some of those activities are summarized below.

Approximately ten years ago, the need to construct a new substation within the Otay Ranch area was identified by SDG&E. SDG&E spent years working intensively on the identification and selection of the site for the new substation. In 2002, SDG&E began working with the City and the University Framework Committee to identify a suitable location for a new substation as part of the early planning efforts for a proposed university within Chula Vista's Otay Ranch area. In early 2007, after extensive discussion and consideration of several substation site alternatives, consensus was reached by SDG&E, the City, and members of the University Framework Committee on the selection of Hunte West (the Proposed Project location) as the preferred substation location. SDG&E spent approximately 2 years working on the substation design with the City. The site acquisition process was suspended in 2008, when the City entered into a Land Offer Agreement with the adjacent property owner, and the Hunte West property was no longer available for development of a substation. This resulted in the need to re-analyze alternative site locations for the Salt Creek Substation. SDG&E worked with the City to analyze three alternative site locations. Based on changes in circumstances in early 2011, Hunte West became available again as a viable location for the proposed Salt Creek Substation. In June 2011, SDG&E purchased the 11.64-acre Hunte West site for development of the Salt Creek Substation to service existing and future development in the surrounding area. SDG&E continued meeting with the City to discuss development plans for the proposed Salt Creek Substation.

The City acknowledges SDG&E initiative and cooperation in initiating and moving forward the development of a new substation at the southeast area of the City. The City appreciates the work that SDG&E has done on this effort and looks forward to continuing to work with SDG&E and the California Public Utilities Commission on processing and implementing the proposed project.

Sincerely,

Gary Halbert, P.E., AICP
Assistant City Manager

APPENDIX I
Estimated Cost Range for Proposed Project

**San Diego Gas & Electric Company (SDG&E) Salt Creek Substation Project
Estimated Project Costs**

Salt Creek Substation Approximate Cost*: \$63,000,000 - \$77,000,000

* All costs are approximate and based on preliminary engineering. Final costs will be determined based on approved final project scope and contracting costs.
