**PREPARED REBUTTAL TESTIMONY OF
JOSEPH PASQUITO
ON BEHALF OF SDG&E**

I. INTRODUCTION

The purpose of this rebuttal testimony is to respond to the jointly submitted testimony of witnesses Mr. Patrick Cunningham and Ms. Mea Halperin on behalf of the Commission’s Office of Ratepayer Advocates (ORA) regarding San Diego Gas & Electric Company’s (SDG&E) 2016 Energy Resource Recovery Account (ERRA) Review Application (Application) addressing the topics of Least-Cost Dispatch (LCD) and Demand Response (DR).¹

At the outset, SDG&E points out that its Record Year 2016 LCD and DR showing is substantively identical in contents, updated as appropriate, to its showing for Record Year 2015 year and previous years.² For each of SDG&E’s ERRA Compliance Applications, the Commission determined SDG&E’s LCD and DR to be compliant with all applicable requirements, including Standard of Conduct (SOC) 4.³ For this year’s submission, as with last year’s, SDG&E followed, for example, the specific filing requirements of Decision (D.) 15-05-005. However, ORA summarily alleges that SDG&E has not carried its burden of proof, disregarding the undeniable fact that SDG&E’s overall showing were substantively identical, and updated as appropriate for Record Year 2016 information, to the Commission-approved showing from last year. Thus, ORA’s allegations that SDG&E: (a) has not carried its burden of proof or

¹ All references to “ORA Testimony” herein refer to ORA’s September 28, 2017 served in this proceeding unless otherwise indicated.

² Decision (D.) 17-03-016 at 11-15.

³ See D.02-10-062 at 51-52, 72-76.

1 (b) has provided “insufficient information”⁴ for ORA to determine that SDG&E has met an
2 applicable standard are not only unsubstantiated and unjustified, but false.

3 Nowhere in ORA’s Testimony does ORA explain what “information” is “deficient.” As
4 will be discussed later, SDG&E maintains that it is unfair and unjust for ORA to inject these new
5 and vague terms into what is essentially a determination of compliance based on a fixed,
6 Commission-approved standard. In some cases, ORA is simply asking for information that it has
7 not previously requested in an SDG&E ERRA Compliance proceeding or is asking for
8 information that is out-of-scope.⁵ These trumped-up, make-weight allegations are ORA’s sole
9 basis for ORA’s recommendation that SDG&E incur the “maximum disallowance,” an
10 outrageous recommendation that SDG&E finds to be totally unjust, unexplained, unsupported
11 and highly suggestive of bad faith. SDG&E did – and should be able to – follow SDG&E’s
12 immediately past LCD and DR showings as a matter of compliance⁶ and not be subject to the
13 arbitrary, mercurial and unjustifiably harsh recommendation from not only the same entity,
14 ORA, but the same witnesses in that entity.

15 Notably, ORA’s Testimony makes no findings that SDG&E failed to achieve least-cost
16 dispatch. This central finding, taken alone, sufficiently contradicts ORA’s recommendation.
17 Considering that SDG&E’s testimony, workpapers, responses to ORA’s 40-page single-spaced
18 Master Data Request, and sixteen (16) additional sets of ORA-issued data request responses,
19 SDG&E provided a showing that was substantively identical to SDG&E’s Record Year 2015

⁴ ORA Testimony at 2-10, 2-13, 2-15.

⁵ ORA at 2-11. Throughout its testimony, ORA complains numerous times that it did not have sufficient time to do its work. However, ORA agreed to this procedural schedule at the August 1, 2017 Prehearing Conference. The fact that ORA did not complete its work in a timely basis or thoroughly review and accurately review SDG&E’s submissions does not mean that SDG&E should be faulted for ORA’s shortcomings.

⁶ See D.14-07-006; D.15-05-005; D.16-05-003; D.17-03-016.

1 showing with the types of data and details. Overall, SDG&E finds that ORA's testimony
2 recklessly painted a false, unsubstantiated and misleading impression of SDG&E's ERRA
3 Compliance showing, disregarding not only precedent but ORA's own prior analyses, with no
4 support for its unjust and unfair maximum disallowance recommendation. This testimony will
5 demonstrate that SDG&E complied with the "showing" requirements of D.15-05-005,⁷ which
6 was a seminal ERRA compliance decision, applicable to all IOUs, setting forth the various
7 components that Investor-Owned Utilities (IOUs) must provide during the course of an ERRA
8 Compliance proceeding "for future showings."⁸

9 **II. SUMMARY OF ORA'S TESTIMONY AND SDG&E'S RESPONSE**

10 In this section, SDG&E summarizes the following ORA recommendations applicable to
11 the Standard of Conduct for LCD and DR as well as SDG&E's responses thereto. Section III of
12 this testimony addresses each of these issues in greater depth.⁹

13 **A. Assessment of Overall Forecasting Accuracy**

14 **ORA's Position:**

15 "SDG&E's load and price forecasting accuracy for Record Periods 2016 appear to be █
16 accurate than those in Record Year 2015. However, SDG&E did not provide enough historical
17 data or context to allow ORA to determine whether SDG&E met the reasonable manager
18 standard forecast accuracy...ORA recommends that the Commission require an independent
19 evaluation of SDG&E's load and price forecast systems in order to determine their

⁷ *Decision Adopting Methodology and Closing Proceeding*, A.11-06-003 (issued May 14, 2015).

⁸ D.15-05-005 at 5-6.

⁹ In this Summary, SDG&E responds in same format and order of issues presented in ORA's summary and testimony.

1 accuracy....ORA is also unable to verify [SDG&E's] business practices to determine whether the
2 errors and omissions reveal failures in SDG&E's overall LCD reporting system.”¹⁰

3 **SDG&E's Response:**

4 Each of ORA's allegations is seriously flawed, factually unsubstantiated, and inconsistent
5 with Commission precedent. First, in SDG&E's ERRA Compliance proceeding from last year,
6 ORA raised a nearly identical set of recommendations based on very similar allegations, and
7 after extensive testimony and briefing, in D.17-03-016, the Commission flatly rejected ORA's
8 position and recommendation.¹¹

9 Second, ORA fails to justify or explain with specificity the alleged purported deficiency
10 that SDG&E “did not provide enough historical data or context,”¹² how that allegation comports
11 with any number of prior Commission decisions, including D.15-05-005, and how ORA can
12 justify what SDG&E believes is an unprecedented request for information outside of the subject
13 Record Year of 2016 and therefore outside of the scope of this proceeding.

14 Third, ORA claims, without any support, that the Commission's “Reasonable Manager”
15 standard applies to the area of forecasting, a claim that SDG&E disputes as there is no precedent
16 to support it. Further, the methodology ORA utilized for reaching its conclusion that SDG&E's
17 forecasting is not grounded in any Commission requirement, nor is ORA's overly simplistic
18 analysis of a year-to-year comparison a valid or supported basis on which to assess forecasting
19 accuracy. ORA's position on SDG&E's “forecasting accuracy” – a central point in ORA's

¹⁰ ORA Testimony at 2-2.

¹¹ D.17-03-016 at 11-12. ORA's Testimony conspicuously omits any reference to or discussion of this very recent precedent and fails to justify its use of a recycled argument inconsistent with that precedent.

¹² ORA Testimony at 2-10.

1 Testimony – is totally baseless and provides no support for ORA’s overall baseless
2 recommendation.

3 **B. Load Bid Calculations**

4 **ORA’s Position:**

5 “A high proportion of load cleared in the day-ahead market [sic] indicates that SDG&E
6 has forecast and procured sufficient energy resources relative to consumer demand, and then
7 appropriately calculated the value of its resources and translated these values into bids that would
8 allow the resources to be economically dispatched. In Record Period 2016, █ of SDG&E’s
9 load cleared in the day-ahead market. This is the █ percentage as in Record Period 2015.”¹³

10 **SDG&E’s Response:**

11 This favorable determination by ORA on a key element of SDG&E’s overall showing is,
12 like other findings, evidence of the inappropriateness of ORA’s maximum disallowance
13 recommendation.

14 **C. Assessment of Thermal Resources**

15 **1. Commitment Cost Reporting**

16 **ORA’s Position:**

17 “ORA recommends that SDG&E significantly improve its commitment cost reporting in
18 compliance with D.15-05-005. SDG&E’s workpapers did not include the reasons for selecting
19 proxy or registered costs, despite the Commission’s clear requirement to do so.”¹⁴

¹³ ORA Testimony at 2-11-12. ORA’s Testimony also notes that on September 1, 2017, SDG&E corrected an error in a workpaper. Presumably ORA does not object to SDG&E’s correction of an error in its voluminous filing. *Id.* at 12.

¹⁴ ORA Testimony at 1-2.

1 **SDG&E's Response:**

2 First, as ORA notes: "In the 2016 Record Period, SDG&E submitted [redacted] proxy costs
3 elections and [redacted] registered cost elections. Out of these [redacted] elections, there were [redacted] incorrect
4 submissions and [redacted] cost impact."¹⁵ In a data request, ORA asked for reasons for selecting proxy
5 or registered cost, and in response, SDG&E provided the methodology applicable to all
6 commitment cost selections which answers the question directly.¹⁶ The type and amount of
7 information we provided was identical to the type and of information we provided last year to
8 ORA, to which ORA had no objection.¹⁷ The Commission approved SDG&E's LCD showing.¹⁸

9 However, as part of this testimony, SDG&E now submits the *new* information sought by
10 ORA as *Attachment F – 2016 Master File (RDT) Change Exceptions Revised 10-20-2017.xlsx*.¹⁹
11 Now that SDG&E understands that ORA will seek the new information as provided,²⁰ SDG&E
12 will provide it in future years in its initial ERRA Compliance application. The material does not
13 affect the reality that SDG&E did, in fact, operate its resources in a least-cost manner.

14 Regardless, this single reporting issue is just one very narrow aspect of SDG&E's
15 voluminous LCD showing, and even absent the material now provided, it does not justify ORA
16 to extrapolate, without evidence, by making broad-brush negative statements about SDG&E's
17 overall LCD performance and reporting.

¹⁵ ORA Testimony at 2-13.

¹⁶ Attachment 1: ORA Data Request, ORA-SDG&E DR-14, Question 3a.

¹⁷ Mr. Cunningham was ORA's LCD witness in SDG&E's previous ERRA Compliance proceeding.

¹⁸ D.17-03-016 at 7 and Conclusion of Law (COL) 2.

¹⁹ Attachment 3 to this testimony is discussed in detail in Section C.1 – Commitment Cost Decisions.

²⁰ Throughout the course of this proceeding, as in prior years, ORA has telephoned SDG&E to ask various questions, many of them substantive, about the proceeding and also to ask SDG&E's experts for assistance in understanding certain issues outside of the proceeding. SDG&E is generally pleased to assist ORA. However, ORA could have offered SDG&E a similar brief courtesy and simply let SDG&E know, by telephone or otherwise, that it was seeking information that it did not require in SDG&E's prior ERRA Compliance showing.

1 **D. Bidding Activity Reporting**

2 **ORA's Position:**

3 “ORA recommends that SDG&E improve its bidding activity reporting to include
4 instances in which energy is not dispatched at all despite the bid price being lower than the
5 locational marginal price (LMP), according to the requirements of D.15-05-005.”²¹

6 **SDG&E Response:**

7 Similar to the forecasting accuracy point noted in Section A, above, ORA is rearguing the
8 same “zero dispatch” issue that it raised in SDG&E’s immediately prior ERRA Compliance
9 proceeding, which the Commission rejected in D.17-03-016.²² The Commission concluded that
10 SDG&E did, in fact, comply with the reporting requirements of D.15-05-005, and further:
11 “Imposing a new requirement on SDG&E is outside the scope of this proceeding. If ORA wants
12 to pursue this documentation in the future, it should seek to include it within the scope of a future
13 proceeding, or – preferably – file a Petition to Modify D.15-05-005.”²³ This issue, too, lends
14 absolutely no support to ORA’s overall recommendation.

15 **E. Self-Scheduling Reporting**

16 **ORA's Position:**

17 “ORA recommends that SDG&E significantly improve its self-scheduling reporting,
18 including providing clear formulas and explanations of its calculations. While SDG&E’s self-
19 scheduling activities did not appear to negatively impact ratepayers, its reporting was difficult to

²¹ ORA Testimony at 2-3.

²² D.17-03-016 at 12-14.

²³ *Id.* at 14. ORA has provided no indication in this proceeding that it is seeking to reargue the requirements of D.15-05-005, or as in the prior reporting matter, applying the existing requirements in a new way to essentially the same showing.

1 interpret. ORA was unable to verify or replicate SDG&E’s cost impact calculations and SDG&E
2 did not address ORA’s discovery questions about additional unexplained self-schedule entries.”²⁴

3 **SDG&E’s Response:**

4 As ORA noted, SDG&E’s self-scheduling activities did not negatively affect ratepayers.
5 However, SDG&E disagrees with ORA’s claim that SDG&E’s self-scheduling reports were
6 “unexplained” or “difficult to interpret,” because SDG&E again provided the same type and
7 amount information in its self-schedule reports as SDG&E provided in its ERRA Compliance
8 application from last year, which were approved. It is unfair and unjust for ORA to create a
9 “moving target” for SDG&E to establish its compliance. SDG&E submitted complete and
10 accurate answers to ORA’s discovery in this area.²⁵ If ORA did not understand some aspect of
11 SDG&E’s answers, then ORA had an obligation to follow-up. SDG&E strongly disagrees with
12 ORA’s unsupported contention that SDG&E “did not address ORA’s discovery questions.”

13 **1. Assessment of Management of Hydroelectric Resources**

14 **ORA’s Position:**

15 “ORA recommends that the Commission require an independent review of SDG&E’s
16 hydro models and hydro bidding practices to determine their accuracy. SDG&E did not
17 demonstrate how it is able to optimize its dispatch based on its reported inputs.”²⁶

18 **SDG&E’s Response:**

19 ORA found that, “Overall, SDG&E demonstrated that it is bidding Lake Hodges for
20 dispatch according to LCD principles, generating energy during times when the price and value
21 of energy is high and pumping when prices are lower.”²⁷ As to ORA’s claim that SDG&E did

²⁴ ORA Testimony at 2-3.

²⁵ Attachment 2: ORA-SDG&E DR-16, Question 3.

²⁶ ORA Testimony at 2-3.

²⁷ ORA Testimony at 2-23.

1 not demonstrate how it is able to optimize dispatch, SDG&E submitted the same spreadsheet,
2 Attachment B, as it submitted in SDG&E’s immediately prior ERRA Compliance proceeding.
3 ORA’s Testimony does not explain why SDG&E’s hydro reporting was adequate last year,
4 whereas ORA deemed the same showing this year not to demonstrate that SDG&E optimized
5 dispatch; at the same time, ORA’s recommendation regarding an “independent review” appears
6 inconsistent with ORA’s finding that: “SDG&E demonstrated that it is bidding Lake Hodges for
7 dispatch according to LCD principles, generating energy during times when the price and value
8 of energy is high and pumping when prices are lower.”²⁸ SDG&E finds ORA’s analysis, once
9 again, inconsistent from year-to-year, and also internally inconsistent. SDG&E dispatched its
10 hydro in full accord with LCD and also provided a clear report demonstrating that it did so.
11 Thus, ORA’s recommendation is flawed and off-base.

12 **2. Assessment of Management of Renewable Resources**

13 **ORA’s Position:**

14 “ORA recommends that the Commission should order SDG&E, PG&E and SCE to hold
15 a workshop in order to develop and standardize reporting requirements for economic renewable
16 curtailment.”²⁹

17 **SDG&E’s Response:**

18 ORA’s forward-looking recommendation is not grounds for criticism of SDG&E’s record
19 year activities or its reporting thereon. Additionally, it is not within the scope of this SDG&E-
20 specific proceeding for ORA to recommend an action that would affect another utility.

²⁸ ORA Testimony at 2-23.

²⁹ ORA Testimony at 2-4.

1 ORA is not at liberty simply to alter the Commission's standards of review for ERRA
2 Compliance Proceedings or required showing that SDG&E should make to establish its
3 compliance with existing standards. It cannot pursue such changes simply by filing testimony;
4 rather, as was noted in D.17-03-016, ORA should file a "Petition to Modify" pertaining to the
5 appropriate Commission Order or Orders.³⁰

6 **3. Assessment of Demand Response Programs**

7 ORA's Position:

8 "ORA recommends that SDG&E examine and re-evaluate its forecasting methodologies
9 and procedures in order to identify areas for improvement. SDG&E did not report any instance
10 when it exercised its discretion to not dispatch its DR resources, but SDG&E also failed to report
11 and explain a significant amount of the instances when trigger conditions were met but no
12 dispatch occurred."³¹

13 SDG&E's Response:

14 While SDG&E seeks to improve its forecasting on an ongoing basis, ORA's allegations
15 regarding SDG&E's reporting are based on false assumptions and flawed metrics. Moreover, the
16 new utilization metric proposed by ORA is not based on any Commission determination,
17 including in D.15-05-005, and SDG&E disagrees that it is valid or appropriate methodology for
18 analyzing SDG&E's demand response programs, as explained further below.

19 **ORA'S OVERALL RECOMMENDATION**

20 In the preceding summary, ORA addresses six areas of SDG&E's LCD and DR
21 submission. In one area, Load Bid Calculations, ORA noted no issues of concern. In another,
22 Assessment of Demand Response Programs, ORA noted no issues of concern with SDG&E's

³⁰ D.17-03-016 at 15.

³¹ ORA Testimony at 2-4.

1 submission but contained a general recommendation applicable to the three IOUs (which
2 SDG&E finds to be inappropriate). Regarding Forecast Accuracy, ORA attempts to re-litigate
3 the same issues as in SDG&E’s immediately prior ERRA Compliance filing and attempts to use
4 a new analysis that is not suggested or required by any Commission-approved decisions.³²

5 Of the remaining three areas, SDG&E also strongly disputes ORA’s allegations but will
6 demonstrate in this testimony the falsity of ORA’s overall recommendation that SDG&E “failed
7 to show compliance with Commission standards of least-cost dispatch,” which forms the basis of
8 ORA’s totally unsupported recommendation that the Commission impose the “maximum
9 disallowance for Standard of Conduct #4 of \$18.6 million.”³³ ORA should withdraw its
10 unfounded and outrageous maximum disallowance recommendation and, instead, propose a
11 constructive and reasonable list of the types of information that it will seek in future ERRA
12 Compliance Applications that it would find as “sufficient” that would supplement SDG&E’s
13 current LCD and DR showing that was, again, deemed “sufficient” last year and compliant with
14 existing requirements from D.15-05-005. ORA should seek only information that is justified by
15 Commission precedent and applicable law and apply its reviewing standards equally and fairly to
16 all IOUs.

17 As it stands, however, SDG&E will vigorously oppose this recommendation and will
18 challenge each of ORA’s specious, unsupported and false contentions.

19 SDG&E respectfully responds to ORA’s recommendations in detail, below.

³² See generally D.17-03-016 and D.15-05-005.

³³ ORA Testimony at 2-4.

1 **III. DISCUSSION**

2 **A. Overall Forecasting Accuracy**

3 ORA’s testimony in Chapter 2 contains a discussion and analysis of SDG&E’s
4 forecasting accuracy. At the outset, it should be noted that SDG&E’s forecasting methodology
5 and the general contents of SDG&E’s showing regarding its forecasting are virtually identical to
6 the forecasting methodology and showing that SDG&E provided in its 2015 Record Year ERRA
7 Compliance proceeding. SDG&E provided this very same metric (absolute average hourly
8 difference) in its testimony last year which was approved by the Commission approximately six
9 months ago as an acceptable manner to report forecasting accuracy.³⁴ Last year’s Order states:
10 “The parties have agreed SDG&E should submit load and price forecast data in the same manner
11 as the attachment to Data Response #6 Question 2 to satisfy the similar requirement in D.15-05-
12 005. The Commission is not opposed to this request and adopts it.”³⁵ ORA’s testimony does not
13 explain why it should be entitled to seek more expansive and older data than the data authorized
14 by the Commission in D.17-03-016 and which ORA itself reviewed and did not object to.

15 ORA now asserts, however, that SDG&E did not provide a “context or baseline” or
16 “historical” data to enable ORA to determine whether SDG&E met the reasonable standard for
17 forecast accuracy with respect to load and price forecasts.³⁶ ORA provides no support for this
18 unsupported and unspecified request for “historical data”; none is specified in D.15-05-005, and
19 to SDG&E’s knowledge, none otherwise exists. SDG&E finds this position curious as ORA has
20 not expressed this position previously, and ORA also has offered no clarification as to what these
21 three terms mean, from ORA’s point of view. On its face, ORA’s insistence on “historical”

³⁴ D.17-03-016 at 12 (issued March 23, 2016).

³⁵ D.17-03-016 at 12.

³⁶ ORA Testimony at 2-9-10.

1 information is outside of the unambiguous scope of this case which deals solely with Record
2 Year 2016. As noted by ORA, SDG&E also provided ORA with information regarding the
3 prior 2015 Record Year. This is the same information provided by SDG&E – and approved by
4 the Commission -- in the previous ERRA Compliance filing; however, SDG&E is now learning,
5 for the first time in ORA’s testimony, that it apparently seeks even older data, which SDG&E
6 believes is unsupported by precedent.³⁷

7 Second, when asked by ORA to provide an average mean absolute percentage error
8 (MAPE), SDG&E provided the absolute average hourly difference exactly as it did in the prior
9 year’s filing and which the Commission approved in D.17-03-016. However, ORA’s testimony
10 proposes the use of the Median Absolute Percentage Error (MAPE), which is a metric ORA
11 proposed last year as well, but which the Commission flatly rejected.³⁸ SDG&E simply compares
12 the absolute value of the nominal difference between actual and forecasted LMPs to keep the
13 magnitude of the error on consistent terms.

14 Third, SDG&E disagrees with ORA’s Testimony that the Record Year 2016 absolute
15 average hourly difference between forecast and actual price, which increased from [REDACTED] to
16 [REDACTED], warrants ORA’s inference that the “quality” of SDG&E’s forecast reporting is at issue.³⁹
17 Forecasting prices is not an exact science, and results vary from year-to-year even with the best

³⁷ ORA’s Testimony unfairly mischaracterizes the discussion between ORA and SDG&E as SDG&E spoke with ORA by phone to understand what additional data it was seeking. During a phone call initiated by SDG&E, SDG&E spoke on July 31, 2016 with ORA’s Mr. Cunningham, who requested that SDG&E provide to ORA “all” hourly forecast and actual data, including “raw” data – a voluminous amount of information that SDG&E did, in fact provide in SDG&E’s initial filing. However, in clarifying SDG&E’s substantive showing, ORA’s Testimony instead decided to refer to this information as a “data dump.” ORA Testimony at fn. 33. ORA cannot have it both ways: complaining that SDG&E provided too much information and simultaneously stating that SDG&E’s showing was somehow “insufficient.”

³⁸ D.17-03-016 at 12.

³⁹ ORA at 2-10.

1 of forecasts and in the most stable circumstances. Forecasting prices in a system with over
2 10,000 nodes, hundreds of generator bids, virtual bids and energy bids at interties is challenging
3 and prone to error even in ideal circumstances. In addition, the bidding behavior of market
4 participants may change frequently and without notice. This modest increase is statistically
5 insignificant and does not warrant ORA’s broader claims regarding the quality of SDG&E’s
6 forecasts.

7 Fourth, ORA’s recommendation that “the Commission require SDG&E to perform an
8 independent evaluation of its load and price forecast systems”⁴⁰ is not justified either by a
9 modest change in the outcome in the forecast results based on ORA’s unsupported metric, or by
10 ORA’s request that SDG&E provide certain “historical” and other data that are unsupported by
11 Commission precedent. In D.17-03-016, the Commission stated: “... we do not adopt [ORA’s]
12 proposal [for an independent evaluation] absent greater clarity as to the potential cost savings
13 from improved accuracy of forecasting, the parameters of any evaluation, and the anticipated
14 costs of it. Meanwhile, we support SDG&E’s “ongoing self-evaluation” “to improve forecasting
15 accuracy.”⁴¹ In this proceeding, ORA merely reargued its prior position that the Commission
16 rejected.

17 Fifth, SDG&E finds unsupported ORA’s contention that the Commission’s “reasonable
18 manager” standard is applicable to the area of utility forecasts. SDG&E’s view is that no
19 Commission precedent supports ORA’s position. In any event, SDG&E acted reasonably in its
20 forecasting.

⁴⁰ ORA Testimony at 2-11.

⁴¹ D.17-03-016 at 11-12.

1 Sixth, ORA noted that SDG&E submitted corrected workpapers that also clarified certain
2 undefined terms, and SDG&E identified and re-submitted the latter of these corrected
3 workpapers on September 1, 2017. ORA, however, appears dissatisfied that SDG&E's
4 workpapers had been corrected "less than one month before ORA's testimony [was] due" and,
5 according to ORA, these were "last-minute corrections."⁴² SDG&E finds it odd that ORA
6 should make such a point of SDG&E's self-corrected workpapers, in light of SDG&E's
7 voluminous filing. Even more strange is ORA's claim that SDG&E's corrections, which were
8 provided to ORA 27 days before ORA's testimony was due, are considered "last-minute." The
9 main point here, one apparently lost on ORA, is that SDG&E's showing does, in fact, provide
10 accurate RT load information in a section of Attachment A of the workpapers. ORA's complaint
11 does not assail SDG&E's compliance with SOC 4.

12 In sum, SDG&E's "overall forecasting accuracy" is consistent with Commission
13 precedent, and its methodology and results are no less solid than what the Commission
14 determined to be acceptable in D.17-03-016. Furthermore, ORA's flawed assessment of
15 SDG&E's forecasting accuracy provides no support for ORA's "maximum disallowance"
16 recommendation.

17 **B. Load Bid Calculations**

18 ORA's testimony states: "A high proportion of load cleared in the day-ahead market
19 indicates that SDG&E has forecast and procured sufficient energy resources relative to consumer
20 demand, and then appropriately calculated the value of its resources and translated these values
21 into bids that would allow the resources to be economically dispatched. In Record Period 2016,

⁴² ORA Testimony at 2-11. Twenty-seven days for ORA to evaluated a single correction made by SDG&E to one of its workpapers is more time than SDG&E had to evaluate the entirety of ORA's testimony, and prepare and submit this testimony. ORA's quibbling and pettiness over minute aspects of SDG&E's filing provide ORA with no grounds to disparage SDG&E's entire LCD and DR submission.

1 97% of SDG&E’s load cleared in the day-ahead market. This is the same percentage as in
2 Record Period 2015....”⁴³

3 SDG&E appreciates this favorable, central finding with respect to SDG&E’s overall
4 showing. SDG&E notes that this finding undermines ORA’s “maximum disallowance”
5 recommendation.

6 **C. Management of Thermal Resources**

7 **1. Commitment Cost Decisions**

8 SDG&E is required to submit to CAISO its expected costs for starting up resources and
9 running them at their minimum load, which are referred to as commitment costs. ORA’s
10 testimony states that, “In the 2016 Record Period, SDG&E submitted [REDACTED] proxy cost elections and
11 [REDACTED] registered cost elections. Out of these [REDACTED] elections, there were [REDACTED] incorrect submissions and
12 [REDACTED] cost impact.”⁴⁴

13 ORA’s testimony noted, for the first time in this year’s ERRA Compliance application,
14 that SDG&E did not identify specific reasons for selecting proxy or registered cost in a summary
15 table and asked for specific reasons in a follow-up data request.⁴⁵ SDG&E found and still finds
16 its demonstrations for commitment costs to be sufficient. First, SDG&E had zero errors in the
17 submission of commitment costs. Second, SDG&E provided the same information in
18 Attachment F – 2016 Master File (RDT) Change Exceptions for 2016 as it did in its Record Year
19 2015 proceeding, to which ORA did not object, and which the Commission approved in D.17-

⁴³ ORA Testimony at 2-11-12. ORA’s Testimony also notes that on September 1, 2017, SDG&E corrected an error in a workpaper. Presumably ORA does not object to SDG&E’s correction of an error in its voluminous filing. *Id.* at 12.

⁴⁴ ORA Testimony at 2-13.

⁴⁵ ORA Testimony at 2-13.

1 03-016. Third, there were no cost impacts from our commitment cost submissions to the
2 CAISO. Fourth, the summary tables are not conducive for listing individual reasons.

3 In response to an ORA data request asking for reasons for its commitment cost selections,
4 SDG&E responded: “The reason SDG&E chooses the registered cost option is to account for
5 costs and constraints that are not fully captured using the proxy cost calculation. The registered
6 cost option allows SDG&E to apply a higher cost in order to capture non-fuel costs. If proxy
7 cost is sufficient to cover start-up and minimum load costs, proxy cost provides more flexibility
8 to change the gas price from day to day.”⁴⁶ SDG&E provided a singular explanation for the
9 registered or proxy cost option which applied to all selections during the record period. This
10 response was (and is) complete and accurate, and the described methodology applied in all
11 selections during the record period. When proxy is sufficient to cover costs, proxy is selected
12 because it provides more flexibility to change gas price which is a major component of start-up
13 and minimum load costs. Otherwise, SDG&E will select registered costs. This response
14 complies with the requirements of D.15-05-005.

15 While SDG&E maintains that its showing with respect to commitment costs was accurate
16 and sufficient, to eliminate this misunderstanding in future ERRA Compliance proceedings,
17 SDG&E proposes that, going forward, it will provide the reasons alongside all selections in
18 *Attachment F – Master File (RDT) change Exceptions.* Attachment 3 demonstrates how SDG&E
19 will provide this information going forward.⁴⁷ It bears mention that these repeated entries
20 provide no additional value in determining whether SDG&E failed to meet LCD.

⁴⁶ Attachment 1: ORA Data Request, ORA-SDG&E DR-14, Question 3a.

⁴⁷ Attachment 3: Attachment F – 2016 Master File (RDT) Change Exceptions.

1 As noted above, SDG&E provided the same information in the same manner in
2 SDG&E's immediately prior year's ERRA Compliance proceeding, to which ORA expressed no
3 concerns. Contrary to ORA's make-weight argument in this case, SDG&E has demonstrated
4 that it had no commitment cost submission errors and followed the requirements of D.15-05-005.
5 This issue, like the others discussed in this testimony, does not justify ORA's maximum
6 disallowance recommendation.

7 **2. Incremental Bid Cost Calculations**

8 SDG&E calculates the incremental costs of its resources based on the variable costs by
9 output level and operational constraints.⁴⁸ ORA's testimony states that SDG&E improved upon
10 the previous Record Period by reducing variances from █ to █, all of which occurred on one
11 day for one configuration of one facility. ORA also stated that the resource was not dispatched so
12 there was no cost impact.⁴⁹ These incremental bid cost calculations are another major
13 component in determining whether SDG&E was in compliance with LCD, and once again, no
14 compliance issues or deficiencies were reported. This positive finding also contradicts ORA's
15 recommendation for a maximum disallowance.

16 **3. Bidding Activity**

17 ORA stated that there were no occasions in Record Period 2016 when SDG&E did not
18 bid a unit into the market when it was available. ORA also stated that SDG&E did not include
19 instances in which energy was not dispatched despite the bid price being lower than the LMP. In
20 keeping with the convention SDG&E used in last year's ERRA filing, *Attachment C - 2016*
21 *Incremental Bid Cost Calculations.xlsx* did not include instances in which energy was not

⁴⁸ Prepared Direct Testimony of Joseph Pasquito at JP-14.

⁴⁹ ORA Testimony at 2-14.

1 dispatched at all because incremental bid calculations are only applicable when the unit is online
2 (dispatched above zero and not a “zero dispatch”) for the applicable hour. Thus, SDG&E
3 reported these hours in the same manner in which they were reported in SDG&E’s Record Year
4 2015 ERRA Compliance proceeding.

5 ORA raised this very same issue in SDG&E’s 2015 Record Year proceeding, in which it
6 recommended that “the Commission require SDG&E to make an additional showing, in future
7 ERRA compliance proceedings, explaining and documenting instances of “zero dispatch.”⁵⁰
8 ORA characterized this “zero dispatch” recommendation not as an additional requirement but as
9 “clarification” of the requirement adopted by D.15-05-005.⁵¹ The Commission responded by
10 rejecting ORA’s recommendation: “Whether one regards the proposed reporting as a
11 ‘clarification’ or ‘additional’ does not alter the fact that ORA proposes SDG&E report something
12 new. The requirements adopted by D.15-05-005 were founded on a Joint Utility proposal. The
13 Commission will not, under the guise of what ORA terms a “clarification,” broaden what was
14 previously jointly proposed by the utilities and subsequently adopted by the Commission.”⁵²

15 The Commission further stated, “Imposing a new requirement on SDG&E is outside the
16 scope of this proceeding. If ORA wants to pursue this documentation in the future, it should
17 seek to include it within the scope of a future proceeding, or – preferably – file a Petition to
18 Modify D.15-05-005.”⁵³

19 Accordingly, the Commission should reject ORA’s attempt in this proceeding to relitigate
20 its recently decided “zero dispatch” recommendation from last year’s proceeding. Moreover,

⁵⁰ D.17-03-016 at 12.

⁵¹ D.17-03-016 at 13.

⁵² D.17-03-016 at 13.

⁵³ D.17-03-016 at 14.

1 ORA's recommendation provides no grounds on which to support ORA's "maximum
2 disallowance" recommendation.

3 **4. Self-Commitment**

4 ORA's testimony states that, "SDG&E self-scheduled dispatchable thermal resources
5 mostly for unit-testing purposes or as a result of fuel limitations." In the entire 2016 Record
6 Year, there was only one occasion in which a resource was self-scheduled in error for only one
7 hour (HE24) on December 14, 2016. SDG&E's initial assessment was that there was no cost
8 impact and later revised its assessment to indicate that there was a "minimal" cost impact of
9 [REDACTED] as indicated on tab 3ciii of *Attachment E - 2016 ERRA Comp - LCD Wrkpr 3c ii and iii*
10 *SS vs Bid Analysis FINAL.xlsx*. This figure represents a reduction in the cost of self-scheduling
11 errors from 2015. ORA claimed that SDG&E did not specify the reason for the self-scheduling
12 error.⁵⁴ However, SDG&E did, in fact, describe the error to ORA as "inadvertent" which is
13 another way of saying that the reason was "human error" – a factually accurate and complete
14 appraisal of what happened.

15 In a separate matter, ORA asked about a self-scheduling event in May 2016 concerning
16 SDG&E's Desert Star generating unit and claimed that SDG&E insufficiently explained the
17 reason for the occurrence.⁵⁵ Not so. SDG&E already provided the reason in the original
18 workpapers in *Attachment D – 2016 ERRA Comp – Self Schedules Supp Data FINAL.xlsx* on tab
19 "All Detailed Support Data" in column S and were further summarized on tab "3ab". This
20 reference clearly states that the reason for self-scheduling was due to fuel limitations which is
21 non-discretionary and intentionally submitted.

⁵⁴ ORA Testimony at 2-17.

⁵⁵ ORA Testimony at 2-16-17.

1 In summary, ORA recommends that SDG&E improve its self-schedule reporting which
2 did not differ in content no specificity from last year's ERRA Compliance application, which
3 was approved by the Commission. However, for these isolated instances in which ORA
4 appeared to be confused by SDG&E's statements, SDG&E proposes to work with ORA to
5 develop a protocol so that both parties can seek clarification on factual issues related to the
6 proceeding.

7 **D. Management of Hydro Resources**

8 Lake Hodges Units 1 and 2 represent a small portion (40 MW) of SDG&E's overall
9 portfolio of resources. ORA's testimony states that, "Overall, SDG&E demonstrated that it is
10 bidding Lake Hodges for dispatch according to LCD principles, generating energy during times
11 when the price and value of energy is high and pumping when prices are lower."⁵⁶ ORA's
12 testimony then claims that SDG&E did not demonstrate how it is able to optimize its dispatch.
13 Once again, SDG&E submitted *Attachment B - 2016 Hydro and Pump Storage*
14 *revised_CONF.xlsx*, a spreadsheet with the same data and in the same format as SDG&E's
15 previous year's testimony, to which ORA had no objections.

16 In direct testimony, SDG&E has described its hydro resource scheduling methodology in
17 the same manner as the previous year's testimony.⁵⁷ San Diego County Water Authority
18 (SDCWA) provides daily availability limits for both generation (typically six hours) and
19 pumping (usually 8 hours), and SDG&E merely maintains water levels through pumping and
20 generating energy on a weekly basis and optimizes the value within those constraints and other
21 restrictions that are determined by the SDCWA. SDG&E uses a price forecast to determine the

⁵⁶ ORA Testimony at 2-23.

⁵⁷ Prepared Direct Testimony of Joe Pasquito at 18-19.

1 highest price hours to generate and the lowest price hours to pump within daily constraints.
2 SDG&E balances reservoir levels on a weekly basis and is not operationally or contractually
3 responsible for the overall water levels of the resevoirs.

4 ORA's testimony states that SDG&E dispatched Lake Hodges Units 1 and 2 at a [REDACTED]
5 percentage of the top 500 LMPs of Record Period 2016.⁵⁸ In ORA Data Request #16, ORA
6 asked what was the cause of the decrease. SDG&E replied that there are daily limits to how
7 many hours of generation (typically six) can be scheduled.⁵⁹ SDG&E explained that, in 2016,
8 there were more days (19) compared to 2015 (9) that contained more than six of the Top 500
9 LMPs. SDG&E further explained that SDG&E would not have been able to schedule generation
10 beyond six hours, which reduced SDG&E's ability in 2016 to capture the highest price hours.

11 ORA's testimony then stated that, "It is unclear how SDG&E can know what the top 500
12 LMPs in a year will be before the year is over."⁶⁰ This statement from ORA is at best perplexing
13 – it does not appear to follow from the facts that SDG&E provided regarding the parameters
14 within which this facility can be scheduled. Again, if there are more than six high LMPs within
15 a day (which occurred more frequently in 2016 than 2015), SDG&E would not be able to take
16 advantage of those higher LMPs because scheduling that facility is typically limited to six hours
17 of generation per day. It appears that, based on ORA's testimony, ORA misunderstands why it
18 would not be feasible for SDG&E to dispatch the unit when there were more than six high LMPs
19 within the same day. However, SDG&E maintains that its explanations have been clear,
20 accurate, and complete.

⁵⁸ ORA Testimony at 2-18.

⁵⁹ Attachment 4: ORA Data Request, ORA-SDG&E DR-16, Question 1d.

⁶⁰ ORA Testimony at 2-18.

1 Based on ORA's misunderstanding, ORA recommends that the Commission require
2 SDG&E to undergo an independent review of its hydro models and hydro bidding practices to
3 determine their accuracy.⁶¹ SDG&E respectfully points out, again, that ORA does not appear to
4 understand the operational and scheduling requirements of SDG&E's hydro facility. SDG&E
5 would be willing to convene a discussion with ORA to alleviate any confusion. However,
6 ORA's misunderstanding of the operation of SDG&E's hydro unit provides no reason for the
7 Commission to approve an independent review.⁶²

8 **E. Management of Dispatchable Renewable Resources**

9 ORA's testimony has no findings specific to SDG&E's showing related to its
10 management of dispatchable renewable resources. However, ORA recommends that SDG&E
11 work together with PG&E and SCE to develop standardized renewable reporting to provide an
12 update to least-cost dispatch requirements to address economic curtailment.⁶³ SDG&E agrees to
13 work with ORA and the other utilities in this respect. However, if ORA wants to have a
14 directive issued in this proceeding applicable to a utility other than SDG&E, then ORA should
15 submit its request in an appropriate procedural vehicle so that all affected entities can consider
16 and opine on that recommendation.

⁶¹ ORA Testimony at 2-23.

⁶² Once again, ORA had a very similar "independent review" recommendation in SDG&E's ERRA Compliance case from last year. The Commission rejected that request in D.17-03-016. If, however, the Commission agrees with ORA's recommendation, SDG&E asks that the costs for this review be recovered through its ERRA account.

⁶³ ORA Testimony at 2-25.

1 **F. Management of Demand Response**

2 **1. SDG&E Disagrees with ORA's Use of a Utilization Rate to Analyze if
3 SDG&E Correctly Operated its Capacity Bidding Program (CPB)
4 During 2016**

5 ORA's testimony contends that SDG&E under-dispatched its Capacity Bidding Program
6 (CBP) during the 2016 Record Year based on a comparison of the actual energy dispatched to
7 the potential energy available.⁶⁴ ORA's view appears to be based solely on its observation that
8 the actual energy SDG&E dispatched under the CBP was low as compared to the amount the
9 program could have dispatched. ORA also states that the amount of dispatches decreased
10 because of the heat rate trigger increasing from 15,000 Btu/kWh to 19,000 Btu/kWh.⁶⁵

11 Although SDG&E agrees that the heat rate increase had an impact on the decrease in
12 dispatches, SDG&E respectfully disagrees with ORA's analysis that the CBP was underutilized
13 because the actual hours it was dispatched was low, compared to maximum dispatchable hours
14 over the entire demand response season. As directed in D.15-05-005,⁶⁶ SDG&E calculates in
15 *Attachment I* (Demand Response Metric 3) the percentage of CBP-DA dispatched compared to
16 the total available when triggers were met. *Attachment I* illustrates that SDG&E dispatched
17 CBP-DA 82% and 17% for CBP-DO of available energy when triggers were met in 2016.⁶⁷
18 Therefore, ORA's utilization rate of 21.2% for CBP-DA and 10.6% for CPB-DO is not an
19 applicable or appropriate indication of whether LCD was achieved.

20 Further, ORA's calculation of the utilization rate is inaccurate, because it included time
21 periods in which the CBP-DA program did not have capacity available. In 2016, the CBP

⁶⁴ *Id.* at 2-26-27.

⁶⁵ *Id.* at 2-27.

⁶⁶ D.15-05-005 at 1.

⁶⁷ Prepared Direct Testimony of Joseph Pasquito, Attachment I "Summary", "CBP DA", and "CBP DO" tabs.

1 accepted nominations on a monthly basis, and in May and June 2016, no aggregators chose to
2 nominate to the CDP-DA program. The utilization rate would have been approximately 32% for
3 CBP-DA had ORA calculated the rate over the times when capacity was available.

4 For these reasons, ORA's analysis of SDG&E's CBP is flawed, and thus ORA's
5 calculations of the "cost impact of reported non-dispatch during trigger conditions" are similarly
6 flawed.

7 **2. The Market Integration Progress Report is Not a Requirement of**
8 **D.15-05-005**

9 ORA states that SDG&E's Wholesale Market Integration Update report is missing data
10 for September and October.⁶⁸ The Market Integration Report was ordered by the Commission in
11 D.14-05-025, requiring the utilities to develop a reporting template to provide feedback on
12 experiences bidding into the CAISO energy markets during the 2015-2016 demand response
13 season.⁶⁹ The Market Integration Report was developed outside of the ERRA process, and is not
14 a requirement of D.15-05-005 or any other Commission directive to be used in a utility's ERRA
15 Compliance showing. According to D.14-05-025, the report is no longer required after 2016.⁷⁰

⁶⁸ ORA Testimony at 2-27.

⁶⁹ D.14-05-025, Ordering Paragraph (OP) 4.

⁷⁰ "4. Within 30 days of the issuance of this decision, Pacific Gas and Electric Company (PG&E), San Diego Gas & Electric Company (SDG&E) and Southern California Edison Company (SCE) shall meet with the appropriate Commission Staff to discuss and develop a reporting template and timeline to provide feedback on the utilities' experience with bidding into the California Independent System Operators (CAISO) energy markets during the 2015-2016 demand response program cycle. Within 30 days of this initial meeting, PG&E, SDG&E and SCE shall each file a finalized reporting template and timeline for approval via a Tier One Advice Letter." D.14-05-025 at OP 4.

1 **3. ORA Falsely Claims SDG&E Failed to Explain 44 Instances of Non-**
2 **Dispatch**

3 SDG&E disagrees with ORA's claim that SDG&E failed to explain and report 44
4 instances of non-dispatch of Capacity Bidding.⁷¹ SDG&E provides explanations for non-
5 dispatch when triggers are met, as is required by D.15-05-005.⁷²

6 Based on ORA's claim that SDG&E failed to report 24 CBP-DA additional instances and
7 20 CBP-DO, SDG&E undertook a new, comprehensive review of Attachment K Demand
8 Response Metric 6_ORA Revised, "DLAP Heat Rate" tab⁷³ and determined that ORA's claim is
9 grossly inaccurate. SDG&E verified that 22 of the 24 CBP-DA instances identified by ORA
10 occurred during May and June 2016.

11 As discussed above, SDG&E did not have any capacity to bid CBP-DA in May and June
12 of 2016 as the CBP-DA program did not receive any nominations from aggregators. As a result,
13 SDG&E had no exceptions to report for May and June. SDG&E did find two instances, on
14 October 19 and 21, 2016 that were excluded from the exception report. SDG&E excluded these
15 occurrences from the exception report because there was no market award from the CAISO in
16 the Day Ahead market, and thus SDG&E did not consider them to be exceptions.

17 SDG&E also verified that 17 of the 20 CBP-DO instances, which ORA incorrectly
18 indicated were exceptions, occurred on weekends. In accordance with the CBP tariff, the
19 program's operational days are Monday through Friday, excluding utility holidays. There were
20 two days, July 7 and 19, 2016, that are, in fact, on the exception report. SDG&E did not account
21 for one day, only May 25, 2016,^h on the exception report.

⁷¹ ORA Testimony at 2-28.

⁷² Attachment 5: Attachment H_ERRA 2016 Demand Response Metric 1 revised October 20, 2017. This attachment includes 3 additional instances of non-dispatch and associated reasons not included in the original Attachment H.

⁷³ ORA Testimony at Attachment 2.27.

1 In total, based on its further thorough review, SDG&E failed to identify three exceptions.
2 ORA is incorrect in claiming SDG&E failed to report 44 instances, as stated in its testimony.
3 Contrary to ORA's assertion, there was not "a high number of dispatch exceptions."⁷⁴ SDG&E
4 has updated the following attachments which were revised on October 20, 2017; *Attachment H*
5 *ERRA 2016 Demand Response Metric I*⁷⁵ and *Attachment K – ERRA Demand Response Metric*
6⁷⁶ to include the three instances and will continue to improve in future compliance filings. The
7 total impact for these three instances was \$74.25 and is illustrated in *Attachment J- ERRA 2016*
8 *Demand Response Metric 5-revised 10-20-2017.xlsx*.^{77,78}

9 **4. SDG&E Disagrees with ORA that SDG&E Failed to Forecast Trigger
10 Conditions that Led to a High Number of Dispatch Exceptions.**

11 ORA's Table 2-2 Cost Impact Summary consists of a table that includes not only the
12 average net savings but also adds potential total net savings. As noted above, ORA alleges that
13 SDG&E failed to forecast trigger conditions that lead to a high number of dispatch exceptions.⁷⁹

14 ORA's testimony fails to recognize that exceptions should be expected for the CBP-DO
15 program, because of the program limitations. The program must be dispatched by 9:00 AM
16 which prohibits the program from bidding into the CAISO market, and market conditions for the
17 typical hours of dispatch are uncertain at that time. Attachment 6 (attached) shows SDG&E
18 dispatched CBP-DO during times of most value, foregoing lower valued events to ensure
19 availability at times of greater demand. This is demonstrated by the savings of \$105.76/MWh

⁷⁴ ORA Testimony at 2-29.

⁷⁵ Attachment 5: Attachment H - ERRA 2016 Demand Response Metric 1.

⁷⁶ Attachment 6: Attachment K – ERRA Demand Response Metric 6.

⁷⁷ Attachment 7: Attachment J - ERRA 2016 Demand Response Metric 5.

⁷⁸ The two CBP-DA occurrences had little to no impact as the actual heat rate was 19,020 and 19,050 compared to the 19,000-heat rate trigger, with a total cost impact of \$6.58. Consistent with the tariff, SDG&E used its discretion not to call the CBP-DO program on this one day, with total cost impact of \$67.67.

⁷⁹ ORA Testimony at 2-29.

1 during events dispatched, compared to only \$68.74/MWh if SDG&E had dispatched every time
2 trigger conditions were met. Accordingly, ORA's analysis is flawed and its conclusions
3 incorrectly suggest that SDG&E was underutilizing this demand response resource.

4 **IV. CONCLUSION**

5 In this testimony, SDG&E has demonstrated that ORA's Testimony contains numerous
6 mistaken, misleading, inappropriate analyses and findings and recommendations that were
7 rejected by the Commission in SDG&E's Record Year 2015 proceeding, or new
8 recommendations that have no basis in a Commission requirement. SDG&E's Record Year
9 2016 LCD and DR showing was identical, with appropriate numerical updates, to its prior year's
10 proceeding, which the Commission approved in D.17-03-016. Given that SDG&E's instant
11 LCD and DR submission provided essentially the same contents and utilized the same
12 methodologies as its prior proceeding, which was approved, ORA's contention that SDG&E
13 provided "insufficient information" and "failed to carry its burden of proof" are patently invalid
14 claims.

15 Significantly, ORA made a few favorable and central findings. However, none of ORA's
16 contentions and recommendations provide any grounds for ORA's brazen, unsupported, and
17 unjust "maximum disallowance" recommendation. ORA should withdraw its unfounded and
18 outrageous maximum disallowance recommendation and, instead, propose a constructive and
19 reasonable list of the types of information that it will seek in future ERRA Compliance
20 Applications that it would find as "sufficient" that would supplement SDG&E's current LCD
21 and DR showing that was, again, deemed "sufficient" last year and compliant with existing
22 requirements from D.15-05-005. ORA should seek only information that is justified by

1 Commission precedent and applicable law and apply its reviewing standards equally and fairly to
2 all IOUs.

3 SDG&E objects to this recommendation in the strongest possible terms and will
4 vigorously oppose it in the remainder of this proceeding.

5 This concludes my prepared rebuttal testimony.

Attachment 1

SDG&E Response ORA-SDGE-A.17-06-006-14 Q3

ORA DATA REQUEST
ORA-SDG&E DR-14
SDG&EERRA COMPLIANCE - A.17-06-006
SDG&E RESPONSE
DATE RECEIVED: August 18, 2017
DATE RESPONDED: September 1, 2017

3. With respect to Attachment F – 2016 Master File (RDT) Change Exceptions, please provide the following information:
- In the written testimony (p. JP-28, lines 5-6), the author states that Table 3 [sic] “summarizes the number of times and the reasons for selecting proxy or registered costs.” This table is also present in Attachment F. Please indicate where and what are the reasons that proxy or registered costs were selected.
 - Despite CAISO’s Commitment Cost Enhancement initiative allowing scheduling coordinators to submit proxy cost bids at up to 1.5 times the CAISO proxy fuel cost calculation, SDG&E submitted 33 registered cost elections and 28 proxy cost elections.
 - Please demonstrate with calculations and any supporting documentation how it was necessary to submit registered elections rather than proxy elections and how the proxy cost upper limit was not sufficient to capture the necessary start-up and minimum load costs.

SDG&E Response to Request 3:

- The table that appears in the testimony of Joesph Pasquito and in Attachment F does not include specific reasons for selecting the proxy or registered costs option because the table is a yearly summary. The reason SDG&E chooses the registered cost option is to account for costs and constraints that are not fully captured using the proxy cost calculation. The registered cost option allows SDG&E to apply a higher cost in order to capture non-fuel costs. If proxy cost is sufficient to cover start-up and minimum load costs, proxy cost provides more flexibility to change the gas price from day to day.
- The CAISO’s Commitment Cost Enhancement initiative does not in fact allow for scheduling coordinators to submit proxy cost bids up to 1.5 times the CAISO proxy fuel cost calculation. The CAISO’s Business Practice Manual (BPM) for Market Instruments states on page 36, “The registered cost option may not exceed 150% of the of the units projected proxy cost for start-up and Minload costs.” This only applies if the Scheduling coordinator elects the registered cost option. If the proxy cost option is selected, then start-up and minimum load bids are limited to 125% of the proxy cost. While proxy cost allows for more flexibility to adjust on a daily basis, this option does not allow for greater costs.

In 2016, the CAISO implemented changes to address intra-day gas volatility related to Aliso Canyon due to natural gas storage facility limitations. The changes allowed for resources connected to SoCal Gas or SDG&E gas systems to revise start-up and minimum load costs for the current day if they were not awarded in the day ahead

DATE RESPONDED: September 5, 2017

Request 3:

With respect to Attachments D and E regarding self-scheduling, please provide the following information:

- a. If, as SDG&E reports in its testimony, the only self-schedule that occurred in Record Period 2016 was for Desert Star in December¹, to what does the entry in Attachment D, Tab 3ci, line 3 refer?
 - i. Is this an occasion in which Desert Star was self-scheduled for reasons besides unit testing or fuel limitations?
- b. What does it mean that on 12/14/16 HE24 Desert Star was “awarded 205 MW above the self-schedule?”²
 - i. Did Desert Star generate 205 MWh or 280 MWh for that hour?
- c. The testimony states that this self-schedule event “had no cost impact.”³ However, Attachment D states that there was an energy award that was paid the LMP.⁴ Does SDG&E not consider this CAISO payment to be a cost impact, adverse or otherwise?
- d. Please explain what is a “hypothetical” non-self-schedule.⁵
- e. What does SDG&E’s reporting of hypothetical non-self-schedules imply or reveal about its LCD activities?

¹ Testimony, p. JP-27.

SDG&EERRA COMPLIANCE - A.17-06-006
SDG&E RESPONSE
DATE RECEIVED: August 28, 2017
DATE RESPONDED: September 5, 2017

SDG&E Response to Request 3:

- a. SDG&E must first correct a misrepresentation contained in this question. SDG&E did not state the only self-schedule that occurred in Record Period 2016 was for Desert Star in December. SDG&E did state in the Direct Testimony of Joseph Pasquito on p. JP-27 that “There was one instance of an **inadvertent** self-schedule for one hour on December 14, 2016 with Desert Star Energy Center.” The entry in Attachment D, Tab 3ci, line 3 refers to a Monthly and Annual Table of self-schedules which *excluded non-discretionary reasons* such as unit testing. Decision 15-05-005, Appendix A, Question 3ci requires this table to be provided with its ERRA filing.
 - i. As stated in the Direct Testimony of Joseph Pasquito on p. JP-27, Desert Star was inadvertently self-scheduled for HE24 on 12/14/16 and therefore outside of unit testing or fuel limitation reasons.
- b. Desert Star was self-scheduled at 280MW for HE24 on 12/14/16. Desert Star received a DA award of 485MW for HE24 which is 205MW above the 280MW self-schedule.
 - i. Desert Star received a DA award of 485MW for HE24 on 12/14/16. The resource actually generated 425MW as dispatched by the CAISO in the Real Time Market.
- c. There are different ways to assess whether there was a cost impact in the circumstances of this matter. In the Direct Testimony of Joseph Pasquito, SDG&E made the assumption that because the resource awarded above the 280MW self-schedule, the resource would have been awarded at 485MW, regardless of the self-schedule. With the assumption that the resource would have been awarded at the 485MW level had it been bid, self-scheduling the resource would not have an impact under this assessment. However, SDG&E is now of the view that because Table 3-b shows costs of \$1,679 above revenues, the cost impact could be interpreted to be \$1,679 – a minimal cost impact. SDG&E will be submitting a revised version of JP-27 reflecting its revised opinion of the cost impact associated with this matter. SDG&E will soon be serving a copy of this revised version of JP-27 to the service list.
- d. In response to Decision 15-05-005, Appendix A, Question 3ci, SDG&E is required to provide “The estimated schedule, estimated revenues, and estimated costs of the resource had it been bid into the market rather than self-committed, using the actual LMPs and resource bid costs.” Since these are estimates based on awards had the resource been bid into the market (a hypothetical condition), SDG&E named Table 3-b as Summary of 2016 Hypothetical Non-Self Schedules.
- e. Decision 15-05-015, Appendix A, Question 3ci requires a hypothetical, hindsight review of the economic result had the resource been bid instead of self-scheduled. SDG&E’s reporting of hypothetical activity does not reveal or imply anything of relevance to our actual bidding and scheduling activity because we are depicting hypothetical, historical activity that did not, in fact, take place.

SDG&EERRA COMPLIANCE - A.17-06-006
SDG&E RESPONSE
DATE RECEIVED: August 28, 2017
DATE RESPONDED: September 5, 2017

**Least-Cost Dispatch and Economically-Dispatched Demand Response (SDG&E Witness
Joseph Pasquito)**

Request 1:

With respect to SDG&E's Lake Hodges activity, please provide the following information:

- a. Why did Lake Hodges pump more absolute MWh than it generated?
- b. Why was more energy self-scheduled than it was bid into the day-ahead market?
- c. Are there any reasons that water would be pumped from the afterbay to the forebay other than for future generation purposes?
- d. Please provide an explanation as to why Lake Hodges was dispatched on fewer of the top 500 LMPs in 2016 than in 2015.
- e. Why was more energy self-scheduled in January, February, and March of 2016 than dispatched in the day-ahead market?
- f. Why was energy only self-scheduled in January 2016?

SDG&E Response to Request 1:

- a. SDG&E is required by contract with the San Diego County Water Authority (SDCWA) to pump sufficient water volumes after displacing water for generation dispatches to maintain weekly reservoir level balances. It takes approximately 1.32MWh of pump to yield 1MWh of generation due to pump efficiency. Therefore, Lake Hodges had more absolute MWh of pump than generation.
- b. SDG&E needed to self-schedule pump and generation hours more than it was bid into the Day Ahead Market to meet contractual obligations which require reservoir levels to be maintained on a weekly basis or to adjust water levels directed by the SDCWA.
- c. Under the Power Purchase Agreement (PPA), the SDCWA has the contractual rights to move water between reservoirs to maintain water operational levels or for emergencies.
- d. The SDCWA sends daily availability notices for Lake Hodges Pump Hydro Facility that typically limit the number of generation hours for a given day to maintain weekly water levels. If a day contains more DA LMPs listed in the Top 500 LMPs, SDG&E may be unable to generate for those hours. This condition occurred 19 times in 2016 and 9 times 2015. This response is also provided in Data Request 14.

ORA DATA REQUEST
ORA-SDG&E DR-16
SDG&EERRA COMPLIANCE - A.17-06-006
SDG&E RESPONSE
DATE RECEIVED: August 28, 2017
DATE RESPONDED: September 5, 2017

- e. Prior to 2016, SDG&E self-scheduled pump and generation hours in the DA market based on SDG&E's forecast of the most economic hours. Self-scheduling provided the greatest certainty to meet the contractual balancing requirement. In February 2016, SDG&E began using a combination of bidding and self-scheduling to further optimize Lake Hodges Pump Storage Facility. Bidding in the DA Market continued for the rest of 2016, but self-scheduling was still required to meet the balancing requirement.
- f. As stated above in the response to 1e, SDG&E began bidding in the DA Market in February 2016.
