Get signed up. Get notified.

WHAT YOU NEED TO KNOW

1 What is AlertSanDiego?

AlertSanDiego is the regional emergency mass notification system used by law enforcement, fire and emergency managers to send protective actions (such as evacuations) to residents and businesses within San Diego County impacted by, or who are at risk of being impacted by, an emergency or disaster.

2 How do I register?

To register your cell phone, VoIP phone and/or email address with AlertSanDiego, visit www.ReadySanDiego.org/AlertSanDiego.

3 Why do I need to register?

All listed and unlisted landline phone numbers are already registered in the AlertSanDiego database. Your cell phone number, VoIP phone number and email address, however, are not. You must proactively register this information into the system to be notified.

4 Will my information remain confidential?

Yes, your information will be kept confidential and will only be used by public safety officials for emergency purposes. Your information will never be sold or used for commercial purposes.

5 What other formats are available?

AlertSanDiego emergency notifications are also available in American Sign Language (ASL) format as a video with English voice and text (Just select the Accessible AlertSanDiego option in Step 3 when you register).
