1 **II. AB 1054 AND THE WILDFIRE FUND**

2 Assembly Bill 1054 was passed by the California State Legislature as an urgency bill on
3 July 11 and signed into law by Governor Newsome on July 12, making the legislation effective
4 immediately. AB 1054 provides two alternative wildfire recovery funds for investor-owned
5 utilities (“utility”) – a “liquidity fund” and a “wildfire fund.”³ To establish the wildfire fund,
6 both SDG&E and Southern California Edison Company (“Edison”) must opt-in within 15 days
7 of AB 1054’s effective date and make the required contributions.⁴ A utility subject to insolvency
8 proceedings or on criminal probation must meet additional requirements to participate in the
9 fund.⁵

10 On July 18, 2019, SDG&E notified the Commission of its commitment to opt-in to the
11 wildfire fund and provide its shareholder contribution.⁶ On July 25, Edison and Pacific Gas and
12 Electric Company (“PG&E”) also opted-in to the wildfire fund, putting the fund into effect. On
13 July 25, and July 26, Edison and SDG&E respectively received their safety certifications.

14 The wildfire fund is expected to be capitalized with up to \$21 million in funds – \$10.5
15 billion from a loan from California’s Surplus Money Investment Fund, and \$10.5 billion from
16 shareholder contributions from SDG&E, Edison, and PG&E.⁷ SDG&E’s portion of the

³ California Public Utilities Code (“Cal. Pub. Util. Code”) §§ 3291, 3292.

⁴ *Id.* at § 3292(a).

⁵ *Id.* at § 3292(b).

⁶ See Sempra Energy and SDG&E SEC Form 8-K (filed July 19, 2019) (“July 19 Form 8-K”) (noting that there are “material benefits available to participating IOUs in the larger Wildfire Fund that are not available in the smaller Liquidity Fund”), available at: <http://investor.sempra.com/static-files/c182aeaf-00b8-48cb-9d48-675852d50c33>, Appendix D.

⁷ See Cal. Pub. Util. Code § 3288(b); 3292(b).

1 shareholder contribution is expected to be 4.3% of that \$10.5 billion;⁸ or approximately \$450
2 million.⁹ SDG&E's initial contribution would be \$322.5 million, with subsequent annual
3 contributions of \$12.9 million for ten years.¹⁰ The utilities must also make \$5 billion in non-
4 capitalized safety investments with funds that can be securitized, but which a utility cannot earn
5 a return upon. SDG&E's share of that total is expected to be \$215 million.¹¹

6 A participating utility may seek payments from the wildfire fund for settlements and
7 court judgments resulting from a catastrophic wildfire event. But it must reimburse the fund for
8 amounts determined to be imprudently incurred in a utility-related ignition by the Commission
9 under Section 451.1 of the California Public Utilities Code. That section contains revised
10 standards for prudence review. Among other changes, Section 451.1 provides that the conduct
11 of a utility with a valid safety certification will be deemed reasonable, unless a serious doubt is
12 raised, in which case the utility must dispel that doubt.¹² The legislation also specifies factors
13 outside of the utility's control to be considered to allow partial to full cost recovery of wildfire
14 liabilities, including temperature, humidity, and wind.¹³

15 The utility's reimbursements to the wildfire fund for imprudently incurred costs are
16 subject to a liability cap. This cap applies only if the utility meets certain requirements,

⁸ See *id.* at § 3280(n).

⁹ See *id.* at § 3280(i)(1).

¹⁰ See July 19 Form 8-K.

¹¹ Cal. Pub. Util. Code § 8386.3(e).

¹² *Id.* at § 451.1(c).

¹³ *Id.* at § 451.1(b).

1 including that it maintains a valid safety certificate.¹⁴ If applicable, the liability cap limits the
2 amount of shareholder exposure for wildfire losses found to be imprudently incurred to 20% of
3 the utility’s transmission and distribution equity rate base for that year on a rolling three-year
4 basis.¹⁵ For SDG&E, this liability cap is estimated to be \$825 million based on 2018 rate base.¹⁶

5 The fund also incentivizes the settlement of insurance subrogation claims at less than or
6 equal to 40% of the total asserted claim value, specifying that such claims “shall be paid [by the
7 fund administrator] unless the administrator finds that the exceptional facts and circumstances
8 surrounding the underlying claim do not justify the electrical corporation’s exercise of such
9 business judgment.”¹⁷ The administrator also has the authority, however, to pay settlement
10 claims that exceed 40% if the administrator determines that the utility exercised its reasonable
11 business judgment in settling for a higher percentage or on different terms.¹⁸ A fully litigated
12 subrogation claim shall be paid the full judgment amount.¹⁹

13 **III. CREDIT RATING AGENCIES RESPONDED TO AB 1054 WITH CAUTIOUS**
14 **OPTIMISM BUT HAVE NOT ALTERED SDG&E’S CREDIT RATINGS**

15 SDG&E opted into the wildfire fund because it believes that the fund provides “material
16 benefits” over the smaller liquidity fund – namely the liability cap and revised prudence standard
17 – that can help moderate the most extreme downside risks, at least in the medium term.²⁰ Credit

20 July 19 Form 8-K.

1 rating agencies Moody’s, Standard & Poor’s (“S&P”) and Fitch (collectively, the “rating
 2 agencies”), likewise indicated that they view AB 1054’s wildfire fund as credit positive. Yet
 3 although the rating agencies removed their negative outlook,²¹ they did not upgrade their credit
 4 ratings for SDG&E following AB 1054’s passage – despite having downgraded SDG&E
 5 multiple times in the past year due to wildfire liability and risk-related issues.²² Table 1 below
 6 illustrates developments by each credit rating agency following the enactment of AB 1054.

7 **TABLE 1: SDG&E Credit Rating Status Post-AB 1054**

Agency	Rating	Outlook	Revision to Credit Rating
Moody’s	Baa1	Positive	None
S&P	BBB+	Stable	None
Fitch	BBB+	Stable	None

8 **A. Credit Rating Agencies Believe that the Wildfire Fund Moderates Certain**
 9 **Risks**

10 Much of the credit rating agencies’ focus in their post-AB 1054 analysis was on the
 11 legislation’s wildfire fund. Consistent with the affirmation of SDG&E’s current credit ratings,

²¹ See S&P Global Ratings, *San Diego Gas & Electric Co. Ratings Affirmed, Outlook Revised to Stable from Negative*, dated July 30, 2019 at 1 (“S&P July 30 Report”) (changing SDG&E’s outlook from negative to stable); Moody’s, *Rating Action: Moody’s affirms San Diego Gas & Electric’s ratings; changes outlook to positive from negative*, dated July 29, 2019 at 1 (“Moody’s July 29 Report”), Appendix E (changing SDG&E’s outlook from negative to positive); Fitch Ratings, *Fitch Affirms San Diego Gas & Electric’s IDR at ‘BBB+’; Outlook Revised to Stable*, dated July 17, 2019 at 1 (“Fitch July 17 Report”), Appendix C (changing SDG&E’s outlook from negative to stable).

²² *Id.*

1 the agencies viewed SDG&E’s participation in the wildfire fund as credit supportive – while
2 noting that uncertainties and challenges remain.²³

- 3 • **Fitch:** the “enactment of A.B. 1054 mitigates the regulatory risks associated with
4 the recovery of catastrophic wildfire liabilities for SDG&E,”²⁴
- 5 • **Moody’s:** “we believe the [wildfire] fund will be large enough to cover all but
6 the most extreme downside scenarios over the next decade,” and “[p]ositive
7 momentum on SDG&E’s rating is possible, barring any wildfire in its service
8 territory” if there is a credit supportive completion of SDG&E’s “pending 2019
9 general rate case and the cost of capital proceeding[.]”²⁵
- 10 • **S&P:** “In our view, over the medium term, AB 1054 could significantly reduce
11 Sempra and its subsidiaries credit risks related to California’s wildfires and
12 California courts’ interpretation of the legal doctrine of inverse condemnation.”²⁶

13 The rating agencies see four primary medium-term benefits from the wildfire fund:

- 14 • The reduction in liquidity risk by having immediate access to funding to cover
15 wildfire liability settlements and/or court judgments;
- 16 • The cap on potential shareholder liability at 20% of a utility’s transmission and
17 distribution rate base;
- 18 • Specified standards for a utility’s reasonable conduct in the legislation’s revised
19 prudency standard; and
- 20 • The incentivized expedient settlement of subrogation claims.

²³ By contrast, Moody’s and S&P would have found participation in the liquidity fund as not credit supportive.

²⁴ Fitch July 17 Report at 3; *see also* S&P Global Ratings, *Sempra Energy and Subsidiaries Ratings Affirmed; Outlooks Remain Negative*, dated July 15, 2019, at 1 (“S&P July 15 Report”), at 1 (“In our view, over the medium term, AB 1054 could significantly reduce Sempra and its subsidiaries credit risks related to California’s wildfires and California court’s interpretation of the legal doctrine of inverse condemnation.”).

²⁵ Moody’s July 29 Report at 1-2.

²⁶ S&P July 15 Report at 1.

1 The liability cap and revised prudence standard are of primary importance. As S&P
2 states, the “critical credit risks” that SDG&E has faced from California’s catastrophic wildfire
3 liability regime “have included the lack of regulatory predictability or certainty regarding the
4 timing and amount of allowable wildfire cost that SDG&E could ultimately recover from
5 ratepayers and the potential effects on the customer bill.”²⁷ S&P believes that SDG&E will thus
6 “benefit from the use of the [wildfire] fund as a source of liquidity, a predetermined cap that
7 limits SDG&E’s liability, and revised standards of a utility’s reasonable conduct that we believe
8 will increase the likelihood that SDG&E will recover future wildfire costs from ratepayers.”²⁸
9 Moody’s similarly added that the “liability cap on cost disallowances is the most credit
10 supportive feature of the [wildfire] fund because it allows us to quantify and limit a utility’s
11 maximum exposure to a catastrophic wildfire event if the utility is not found to be prudent
12 according to the new prudence standard.”²⁹

13 The rating agencies view the 40% subrogation incentive as contributing to the wildfire
14 fund’s durability. As Moody’s stated, even “though the fund is capitalized with \$21 billion of
15 capital . . . it should be able to address over \$40 billion of gross claims.”³⁰ The agency added
16 that the “actual net usage of the [wildfire] fund should be considerably lower than the gross

²⁷ S&P July 15 Report at 2.

²⁸ S&P July 30 Report at 1; *see also* S&P July 15 Report at 1-2 (the wildfire fund can “reduce [SDG&E’s] liquidity risk, allow for a predetermined cap that limits SDG&E’s liability, and specify the standards of a utility’s reasonable conduct, increasing the likelihood that SDG&E could recover future wildfire costs.”).

²⁹ Moody’s July 29 Report at 1; *see also* Moody’s, *Rating Action: Moody’s affirms San Diego Gas & Electric Company’s ratings; outlook remains negative*, dated July 12 at 1 (“Moody’s July 12 Report”), Appendix B (the wildfire fund “caps the amount of cost disallowance associated with catastrophic wildfires and applies a more credit supportive prudence standard.”).

³⁰ Moody’s July 29 Report at 1.

1 claims amounts because utilities are expected to maintain \$1 billion of wildfire insurance each
2 and the fund is designed to only pay subrogation claims that are settled at 40 cents on the dollar
3 or less.”³¹ Fitch similarly adds that the subrogation claims provision “is expected to reduce
4 regulatory lag and preserve the utility’s financial health.”³²

5 **B. Credit Rating Agencies Note that Uncertainty and Long-Term Challenges**
6 **for SDG&E Remain**

7 Yet S&P, Moody’s, and Fitch indicate that they continue to believe that SDG&E faces
8 ongoing, heightened risks – reflected in the fact that none of the credit rating agencies changed
9 or increased the Company’s credit rating despite repeatedly lowering the Company’s credit
10 ratings in the last year.³³ According to the credit rating agencies’ statements, the agencies’
11 hesitancy to increase SDG&E’s credit ratings is due, in part, to two issues: uncertainty regarding
12 AB 1054’s implementation; and the legislation’s failure to address SDG&E’s ongoing
13 heightened long-term risks.

14 As Moody’s stated, a “failure to successfully implement the provisions of AB 1054
15 associated with the [wildfire] fund in a consistent and credit supportive manner” would likely
16 trigger negative credit momentum on SDG&E’s credit rating.³⁴ The credit rating agencies noted
17 the existence of risks related to the implementation of the wildfire fund’s two most beneficial
18 features – how the new prudence standard in Section 451.1 will be applied by the Commission,

³¹ *Id.*

³² Fitch July 17 Report at 2.

³³ *See* Prepared Direct Testimony of Don Widjaja (April 2019) (Ex. SDG&E-03 (Widjaja)) at 12 (charting SDG&E credit rating downgrades in 2018 and 2019).

³⁴ Moody’s July 12 Report at 2; *accord* Moody’s July 29 Report at 2.

1 and the durability of the wildfire fund.³⁵ With regard to the prudence standard, Fitch stated that
2 “the lack of a track record of implementing the new legislation” – “especially the new prudence
3 standard which is subject to interpretation” – is a “credit constraint[.]”³⁶ S&P adds that if “the
4 [C]ommission does not implement AB 1054 in a credit-supportive manner then much of the new
5 law’s credit-supportive elements related to the revised standards of a utility’s reasonable conduct
6 could potentially be negligible.”³⁷

7 With regard to the fund’s durability, S&P notes that if the wildfire fund is exhausted,
8 SDG&E “loses the credit benefit of using the [wildfire] fund as a source of liquidity and more
9 importantly loses the credit protection of the liability cap,” leaving only the revised prudence
10 standard.³⁸ The wildfire fund’s potential depletion thus ties to the “longer-term risks” for
11 SDG&E that AB 1054 does not address – principally, inverse condemnation.³⁹ As Fitch states,
12 the “continuation of inverse condemnation remains a long-term credit issue for SDG&E as an
13 electric utility in California.”⁴⁰

³⁵ See S&P July 30 Report at 2 (“Another long-term risk deals with the uncertainty as to how the CPUC, which is responsible for implementing much of the new law, will interpret AB 1054.”).

³⁶ Fitch July 17 Report at 1; *see also* Moody’s July 29 Report at 1 (“Pending application of this revised [prudency] standard by the [CPUC], its implementation will likely strengthen our view of the credit supportiveness of the regulatory environment in California.”).

³⁷ S&P July 30 Report at 2.

³⁸ *Id.* at 1-2.; *accord* Moody’s July 12 Report at 1 (“[i]f and when the [wildfire] fund’s claims paying capability is exhausted, the majority of the credit friendly structures, including the disallowance cap, will terminate.”).

³⁹ S&P July 30 Report at 1.

⁴⁰ Fitch July 17 Report at 1; *see also id.* at 4 (stating that “indications that a repeal of inverse condemnation doctrine is forthcoming” would be a development that may lead to a positive ratings action).

1 In other words, if the wildfire fund is exhausted, SDG&E’s investors are once again
2 potentially exposed to unmitigated downside risks from inverse condemnation.⁴¹ S&P thus sees
3 “the lack of an automatic replenishing mechanism and the depleting nature” of the wildfire fund
4 as additional long-term threats.⁴² Fitch adds that, if the “[f]requency and magnitude of
5 catastrophic wildfires in the next few years deplete the fund much sooner than expected,” it
6 could lead to a negative ratings action.⁴³ S&P agrees, noting that this risk is particularly
7 problematic because it is largely outside of SDG&E’s control, as AB 1054 “directly associates
8 SDG&E’s credit quality to the operations of its California electric utility peers.”⁴⁴ This means
9 that “even if SDG&E continues to maintain operational excellence, its longer-term benefit of the
10 credit-supportive liquidity cap is ultimately dependent on the operations of California’s other
11 investor-owned electric utilities that are also contributing to the [wildfire] fund.”⁴⁵

12 The three credit rating agencies also see additional, continued outstanding risks to
13 SDG&E beyond AB 1054 – namely regulatory risks related to the outcomes of this cost of
14 capital proceeding and the Company’s pending 2019 General Rate Case. Moody’s stated that its
15 positive outlook “assumes” credit “supportive outcomes of the utility’s ongoing regulatory

⁴¹ S&P July 30 Report at 1-2.

⁴² *Id.* at 1.

⁴³ Fitch July 17 Report at 4.

⁴⁴ S&P July 30 Report at 2.

⁴⁵ *Id.* at 2; *see* also Fitch July 17 Report at 3 (the durability of the wildfire fund) depends on the “frequency and severity of wildfires in other [investor-owned utilities’] service territories as well as their safety conduct,” leaving SDG&E vulnerable to “contagion risks.”).

1 proceedings . . . includ[ing] its 2019 general rate case and the *cost of capital*,”⁴⁶ adding that its
2 understanding of a credit supportive outcome in this cost of capital proceeding includes a
3 favorable outcome regarding SDG&E’s request to “increase [] it’s equity layer to 56%.”⁴⁷ By
4 contrast, the rating agency stated that “[d]ownward pressure is [] likely if SDG&E records credit
5 metrics that are weaker than currently anticipated for example due to outcomes of pending
6 regulatory proceedings that are not credit supportive.”⁴⁸

7 In short, the three credit rating agencies merely affirmed their current credit ratings for
8 SDG&E – despite having downgraded the Company at least two notches each in the last year.
9 As SDG&E witness Todd Shipman discusses (Exhibit SDG&E-05-S, Chapter 2), the credit
10 rating agencies evidently did not view AB 1054, standing alone, as enough to justify increasing
11 SDG&E’s credit ratings.

12 For example, S&P states that, while it believes that “the credit-supportive liability cap
13 and the revised standards of a utility’s reasonable conduct will offset the rising risks of
14 [SDG&E’s] increased susceptibility to catastrophic wildfires due to climate change and
15 California courts’ interpretation of inverse condemnation over the medium term,” it continues to
16 “view SDG&E’s business risk profile as being at the higher end of the range for its business risk
17 profile category.”⁴⁹ S&P added that an upgrade to SDG&E’s credit rating in the next 18 months
18 would largely be dependent upon “if California’s investor-owned electric utilities participating in

⁴⁶ Moody’s July 29 Report at 1 (emphasis added); *see also* Fitch July 17 Report at 4 (similarly noting that a “favorable GRC order and/or meaningful improvement in rate regulation” could lead to a positive ratings action for SDG&E.).

⁴⁷ Moody’s July 12 Report at 2.

⁴⁸ Moody’s July 29 Report at 2.

⁴⁹ S&P July 30 Report at 2.

1 the [wildfire] fund consistently improve their operations such that they are not found to be the
2 cause of a catastrophic wildfire.”⁵⁰ This indicates that it will be a long process for any ratings
3 improvement – likely dependent on experience with the application of the revised prudency
4 standard, the wildfire fund’s durability, and credit-supportive outcomes in this cost of capital
5 proceeding.

6 **IV. SDG&E’S PROPOSED CAPITAL STRUCTURE REQUEST AND OTHER**
7 **PROPOSALS REMAIN NECESSARY**

8 Other than the modified ROE proposal, discussed below, SDG&E maintains the
9 recommendations included in the Company’s application and direct testimony, submitted on
10 April 22, 2019. This includes its capital structure proposal. Consistent with the indications
11 above that SDG&E’s current credit rating is at least partly dependent on the Company’s capital
12 structure request being approved, SDG&E continues to propose a capital structure of 56%
13 common equity, 44% debt, and 0% preferred stock. As noted in the Company’s direct
14 testimony, this proposed capital structure reflects SDG&E’s actual capital structure for the past
15 five years, a measure that the Commission has previously used to set the recorded structure.⁵¹

16 SDG&E’s proposed capital structure also helps to manage the Company’s continued,
17 ongoing risks.⁵² As noted, while AB 1054 has marginally decreased SDG&E’s exposure to
18 unmitigated catastrophic wildfire liability, heightened risks from wildfire liability remain – as do
19 the other ongoing threats that SDG&E faces. This, again, is reflected in the fact that the credit
20 rating agencies did not alter SDG&E’s credit profile; indicating that the Company still faces

⁵⁰ *Id.* at 3.

⁵¹ Prepared Direct Testimony of Maritza Mekitarian (April 2019) (Ex. SDG&E-02 (Mekitarian)) at 5 (citing D.18-03-035).

⁵² Ex. SDG&E-02 (Mekitarian) at 7.

1 increased business risks that SDG&E’s capital structure proposal is designed to help
2 counterbalance by reducing financial risks.⁵³ In fact, as noted, Moody’s suggested that SDG&E
3 could face downward pressure on its credit rating if its equity ratio is set at less than 56% in this
4 cost of capital proceeding.⁵⁴ An increased equity ratio thus remains critical to lessen SDG&E’s
5 financial risks, counterbalance the Company’s increased business and regulatory risks, and
6 address SDG&E’s lowered credit ratings.⁵⁵

7 **V. SDG&E REVISED ROE AND ROR REQUEST**

8 Based on the discussion of risks set forth above and in SDG&E’s additional supplemental
9 testimony, SDG&E now proposes a 12.38% ROE. This ROE request is based upon the
10 recommendations of Dr. Roger Morin (Exhibit SDG&E-04) and Concentric Energy Advisors
11 (“Concentric”) (Exhibit SDG&E-04-S). As Dr. Morin used a traditional proxy-based approach
12 that compared SDG&E to a proxy group of non-California utilities that do not face risks from
13 California’s catastrophic wildfire liability regime, his 10.9% “barebones” ROE recommendation
14 remains unchanged.⁵⁶ Indeed, Dr. Morin indicated that his recommendation reflected the fact
15 that equity investors were discounting SDG&E’s risks on the expectation of some form of
16 legislative relief – expectations that turned out to be accurate.⁵⁷

⁵³ See S&P July 30 Report at 2 (“Accordingly, we view SDG&E’s business risk profile as being at the higher end of the range”).

⁵⁴ See Moody’s July 29 Report at 2; Moody’s July 12 Report at 2.

⁵⁵ Prepared Direct Testimony of Dr. Roger Morin (April 2019) (Exhibit SDG&E-04) at 62.

⁵⁶ See *id.* at 5; see also *id.* at 55 (noting that the proxy group was comprised of a “less risky group of companies”).

⁵⁷ See *id.* at 60.

1 Concentric similarly determined that AB 1054 mitigates, but does not eliminate,
 2 SDG&E’s risks from catastrophic wildfire liability. Concentric focuses on two risks that remain
 3 post-AB 1054: a wildfire with an imprudence finding; and the potential insolvency of the
 4 wildfire fund. Concentric applied the same three approaches they used in direct testimony – the
 5 “Estimated Loss Approach,” the “Insurance Approach,” and the “CAT Bond” Approach – to
 6 quantify the remaining catastrophic wildfire liability risks faced by investors following AB
 7 1054’s passage that are unique to California utilities and not shared with Dr. Morin’s proxy
 8 group.⁵⁸

- 9 • The Estimated Loss Approach quantifies the post-AB 1054 annual loss risk to
 10 investors from a utility-related catastrophic wildfire;⁵⁹
- 11 • The Insurance and CAT Bond Approaches apply market data from SDG&E’s
 12 insurance coverage costs to determine the equivalent value that investors require
 13 to self-insure the remaining potential catastrophic wildfire liability loss.⁶⁰

14 Based on the analyses performed by Dr. Morin and Concentric, SDG&E presents an
 15 aggregate ROE proposal of 12.38%, as shown in Table 2 below.

16 **TABLE 2: Proposed ROE**

Source	ROE Proposal
Dr. Morin Traditional ROE Proposal	10.9%
Concentric Wildfire Premium	1.48%
Overall ROE Proposal	12.38%

17
 58 See Prepared Supplemental Testimony of Concentric, Chapter 1 (Aug. 2019) (Ex. SDG&E-05-S (Concentric) Ch. 2) at 2-3.

59 *Id.* at 12-13.

60 *Id.* at 17, 18-19.

1 SDG&E's ROE proposal continues to reflect its belief that a proxy group of non-
2 California peers does not fully capture SDG&E's risks from California's catastrophic wildfire
3 liability regime. And, as noted in my direct testimony, investors view California's utilities as
4 riskier than average – even if wildfire liability risk is removed.⁶¹ Quantifying that risk based
5 upon the Company's own internal modeling of wildfire loss and how the insurance industry and
6 bond markets price that risk, in combination with Dr. Morin's traditional peer group review
7 approach, more accurately captures the Company's cost of equity.

8 SDG&E's revised ROE request (from 14.3% put forth in my direct testimony to 12.38%
9 as presented here) is a decrease of 192 basis points (1.92%), from the Company's proposal
10 included in its application and direct testimony. With the proposed revisions to SDG&E's ROE,
11 SDG&E also updates its requested ROR from 10.03% to 8.95%. This represents a decrease in
12 ROR of 108 basis points (1.08%), compared to the Company's original proposal. SDG&E's
13 updated proposals requested herein, if approved, will result in an estimated \$110 million (\$95
14 million electric and \$15 million gas) revenue requirement increase for ratepayers over currently
15 authorized levels.

16 **VI. CONCLUSION**

17 Credit rating agencies believe that AB 1054's wildfire fund somewhat moderates
18 SDG&E's risks in the medium-term, primarily by creating a wildfire fund that caps the potential
19 amount of investor liability and revises the standard for reasonableness review. But the credit
20 rating agencies have expressed uncertainty as to how the revised prudence standard will be
21 implemented. And those agencies remain concerned that the wildfire fund could eventually be

⁶¹ Prepared Direct Testimony of Bruce Folkman (April 2019) (Ex. SDG&E-01 (Folkmann)) at 19 (citing Prepared Direct Testimony of Concentric, Chapter 1 (April 2019) (Ex. SDG&E-05 (Concentric) Ch. 1) at 48).

1 exhausted, leaving utility investors again exposed to unmitigated potential liability from inverse
2 condemnation. As a result, the credit rating agencies did not increase SDG&E's credit ratings.
3 To reflect these slightly reduced, but still heightened, risks, SDG&E now proposes an ROE of
4 12.38% and an ROR of 8.95%. All other proposals remain unchanged.

5 This concludes my prepared supplemental testimony.

6

Item 8.01 Other Events.

Assembly Bill (“AB”) 1054 and the companion bill AB 111 (collectively, the “Wildfire Legislation”) were approved by the California Legislature on July 11, 2019. The Wildfire Legislation will be sent to Governor Newsom and he is expected to sign the Wildfire Legislation into law in the near future. The Wildfire Legislation will take effect immediately following the Governor’s signature. The Wildfire Legislation addresses certain important issues related to catastrophic wildfires in the State of California and their impact on investor-owned electric utilities (“IOUs”). Investor-owned gas distribution utilities such as Southern California Gas Company, a subsidiary of Sempra Energy, are not covered by this legislation. The issues addressed include cost recovery standards and requirements, wildfire mitigation, a wildfire recovery fund, a cap on liability, and the establishment of a wildfire safety board. There are two alternative wildfire recovery funds that may be selected by the IOUs and the availability of certain features of this legislation depends on which fund is selected. The summary of the Wildfire Legislation below is not complete and is subject to, and qualified in its entirety by, the Wildfire Legislation.

REQUIRED FEATURES OF THE WILDFIRE LEGISLATION

The Wildfire Legislation has a number of significant reforms relative to IOUs, including San Diego Gas and Electric Company (“SDG&E”), a subsidiary of Sempra Energy. Those material features include the following:

- Creation of a Wildfire Safety Division and its advisory board, initially within the California Public Utilities Commission (“CPUC”), to review and approve or deny the Wildfire Mitigation Plans (“WMPs”) of the IOUs.
- Creation of a Liquidity Fund administered by the state - The fund would provide liquidity to pay IOU wildfire-related claims, subject to review by the fund administrator, within 45 days of the fund administrator’s approval.
- \$5 billion of capital investment by IOUs to support wildfire mitigation - The IOUs will (i) make these capital investments, which will be included in their WMPs, and (ii) recover their securitized financing costs without return on equity, with SDG&E’s share expected to be \$215 million, or 4.3% of the \$5 billion capital investment.
- Annual Safety Certification (“ASC”) - The IOUs, subject to meeting various requirements, will receive an ASC from the CPUC.
- Retained Insured Exposures - The IOUs will continue to procure reasonable amounts of insurance or amounts determined by the fund administrator. Only claims in excess of the greater of \$1 billion or the amount of insurance coverage required by the fund administrator are eligible for coverage by the Wildfire Fund.

The Liquidity Fund will be initially capitalized by a loan of up to \$10.5 billion from California’s Surplus Money Investment Fund (“SMIF”). The SMIF loan will be repaid with proceeds anticipated to be received from the issuance of new California Department of Water Resources’ (“DWR”) bonds. Reimbursement of the Liquidity Fund would be by ratepayers or IOU shareholders, depending on the outcome of a CPUC prudence review, which would be conducted under pre-existing standards pursuant to Section 451 of the California Public Utilities Code.

OPTIONAL FEATURES OF THE WILDFIRE LEGISLATION

The Wildfire Legislation also includes features that are available at the IOUs’ option. IOUs not subject to an insolvency proceeding, which are SDG&E and Southern California Edison Company (“Edison”), may collectively notify the CPUC of their commitment to provide shareholder contributions as described below. This option will not be available unless both SDG&E and Edison commit to participate. Subject to making this commitment and the initial shareholder contributions, the Liquidity Fund described above will be used to help fund the Wildfire Fund described below, the other required features described above will still apply, and the following additional material features become operative:

- Creation of a Wildfire Fund - The fund would be initially established using the SMIF loan described above, with a similar repayment arrangement using proceeds anticipated from the issuance of new DWR bonds. The Wildfire Fund would provide liquidity to the participating IOUs to pay wildfire-related claims, subject to review by the fund administrator.
 - IOU Shareholder Liability Cap and Obligation to Reimburse - The Wildfire Fund provides clarified standards for the CPUC to apply in its prudence review, described below, in the event of wildfire losses. To the extent the IOU losses are found to be prudently incurred, the Wildfire Fund would absorb those losses. To the extent the IOU losses are found to be imprudently incurred, IOU shareholders would reimburse such losses to the Wildfire Fund, subject to a Liability Cap described below.
-

- Liability Cap - Subject to the IOU holding a valid ASC, a shareholder liability cap would limit the amount shareholders must pay for losses found to be imprudently incurred to 20% of the IOU's Transmission and Distribution Equity Rate Base on a rolling three-year basis. These payments would be used to reimburse the Wildfire Fund.
- Prudency Standard of Review - The prudency standard of review would be modified to require that, when reviewing wildfire liability losses paid, the CPUC apply clear standards, similar to the Federal Energy Regulatory Commission standard, when determining the reasonableness of a utility's conduct related to an ignition. Under this standard, an IOU's conduct will also be deemed reasonable if a valid ASC is in place, unless a serious doubt is raised, in which case the utility must dispel it.
- Insurance Subrogation Claim Limit - The fund administrator will generally limit payments of subrogation claims to 40% of the claim value.

If Pacific Gas & Electric Company ("PG&E"), Edison and SDG&E participate in the fund, shareholder contributions would initially be \$7.5 billion with additional annual contributions of \$300 million a year over ten years for a total shareholder contribution of \$10.5 billion. These shareholder contributions would be combined with the Liquidity Fund proceeds, for a total of \$21 billion. PG&E's participation in the fund is subject to specific conditions. If PG&E does not participate in the fund, the total amount in the fund would be materially less. SDG&E's portion of the shareholder contribution, whether or not PG&E participates, is expected to be approximately \$450 million, with approximately \$325 million paid within 60 days after the Wildfire Legislation is signed into law.

The Liability Cap for SDG&E would be approximately \$825 million based on its 2018 rate base and would adjust on a rolling three-year basis. The Liability Cap would apply so long as the fund has not been terminated, which could occur if funds are exhausted.

SDG&E is evaluating the alternative features available under the Wildfire Legislation, and anticipates a decision on whether to participate in the Wildfire Fund within 15 days following the effective date of the Wildfire Legislation, as required by such legislation.

Information Regarding Forward-Looking Statements

We make statements in this report that are not historical fact and constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are based upon assumptions with respect to the future, involve risks and uncertainties, and are not guarantees of performance. These forward-looking statements represent our estimates and assumptions only as of the filing date of this report. We assume no obligation to update or revise any forward-looking statement as a result of new information, future events or other factors.

In this report, when we use words such as "believes," "expects," "anticipates," "plans," "estimates," "projects," "forecasts," "contemplates," "assumes," "depends," "should," "could," "would," "will," "confident," "may," "can," "potential," "possible," "proposed," "target," "pursue," "outlook," "maintain," or similar expressions, or when we discuss our guidance, strategy, plans, goals, vision, mission, opportunities, projections, initiatives, objectives or intentions, we are making forward-looking statements.

Factors, among others, that could cause our actual results and future actions to differ materially from those described in any forward-looking statements include risks and uncertainties relating to: the greater degree and prevalence of wildfires in California in recent years and the risk that we may be found liable for damages regardless of fault, such as where inverse condemnation applies, and risk that we may not be able to recover any such costs in rates from customers in California; actions and the timing of actions, including decisions, new regulations and issuances of authorizations by the California Public Utilities Commission, U.S. Department of Energy, California Department of Conservation's Division of Oil, Gas, and Geothermal Resources, U.S. Environmental Protection Agency, Federal Energy Regulatory Commission, Pipeline and Hazardous Materials Safety Administration, states, cities and counties, and other regulatory and governmental bodies in the U.S.; the success of business development efforts and construction projects, including risks in (i) obtaining or maintaining authorizations; (ii) completing construction projects on schedule and budget; (iii) counterparties' ability to fulfill contractual commitments; (iv) winning competitively bid infrastructure projects; and (v) the ability to realize anticipated benefits from any of these efforts once completed; the resolution of civil and criminal litigation and regulatory investigations and proceedings; actions by credit rating agencies to downgrade our credit ratings or to place those ratings on negative outlook and our ability to borrow at favorable interest rates; deviations from regulatory precedent or practice that result in a reallocation of benefits or burdens among shareholders and ratepayers; denial of approvals of proposed settlements; delays in, or denial of, regulatory agency authorizations to recover costs in rates from customers or regulatory agency approval for projects required to enhance safety and reliability; moves to reduce or eliminate reliance on natural gas; the availability of electric power and natural gas and natural gas storage capacity, including disruptions caused by failures in the transmission grid, limitations on the withdrawal or injection of natural gas from or into storage facilities, and equipment failures; weather conditions, natural

disasters, accidents, equipment failures, computer system outages, explosions, terrorist attacks and other events that disrupt our operations, damage our facilities and systems, cause the release of harmful materials, cause fires and subject us to third-party liability for property damage or personal injuries, fines and penalties, some of which may not be covered by insurance (including costs in excess of applicable policy limits), may be disputed by insurers or may otherwise not be recoverable through regulatory mechanisms or may impact our ability to obtain satisfactory levels of affordable insurance; cybersecurity threats to the energy grid, storage and pipeline infrastructure, the information and systems used to operate our businesses and the confidentiality of our proprietary information and the personal information of our customers and employees; changes in capital markets, energy markets and economic conditions, including the availability of credit; and volatility in interest and inflation rates and commodity prices and our ability to effectively hedge the risk of such volatility; the impact of federal or state tax reform and our ability to mitigate adverse impacts; the impact on competitive customer rates and reliability of electric transmission and distribution systems due to the growth in distributed and local power generation and from possible departing retail load resulting from customers transferring to Direct Access and Community Choice Aggregation or other forms of distributed and local power generation and the potential risk of nonrecovery for stranded assets and contractual obligations; and other uncertainties, some of which may be difficult to predict and are beyond our control.

We caution you not to rely unduly on any forward-looking statements. You should review and consider carefully the risks, uncertainties and other factors that affect our business as described herein and in our most recent Annual Report on Form 10-K and other reports that we file with the U.S. Securities and Exchange Commission.

APPENDIX B

MOODY'S JULY 12 REPORT

Rating Action: Moody's affirms San Diego Gas & Electric Company's ratings; outlook remains negative

12 Jul 2019

Approximately \$5 billion of debt securities affected

New York, July 12, 2019 -- Moody's Investors Service ("Moody's") today affirmed San Diego Gas & Electric Company's (SDG&E) ratings, including its Baa1 Issuer rating, A2 senior secured rating as well as its P-2 short-term rating. The outlook remains negative. See rating list below for the complete list of ratings for SDG&E.

RATINGS RATIONALE

The ratings affirmation follows the passage of legislation in California (AB 1054 and other bills) establishing a wildfire fund to enhance liquidity and including other measures to mitigate wildfire risk for the state's utilities. The legislation is credit positive because it helps address the more contentious political and regulatory environment that emerged in California over the past twenty four months. The bill provides the investor-owned utilities with two options to participate in the catastrophic wildfire fund -- the liquidity fund option or the insurance fund option - to reduce financial exposure to wildfires.

"The insurance fund option is more credit supportive of SDG&E's credit profile than the liquidity fund by a wide margin" said Natividad Martel VP -- Senior Analyst, "However, the negative outlook reflects the existing uncertainty as to which option is chosen."

For the insurance fund to be created, both SDG&E, and its neighboring utility, Southern California Edison (SCE), have to elect this option in about two weeks. Moody's notes that SDG&E has a smaller contribution requirement to the insurance fund than SCE but the two utilities are somewhat tied together with respect to their decision making. Upon receipt of all necessary certifications, the insurance option is likely to stabilize the credit profile for both utilities, all else being equal.

Under both wildfire fund options, SDG&E and SCE would have access to immediate liquidity in the event of a wildfire. However, the insurance fund provides a much higher level of near-term risk reduction for SDG&E because it caps the amount of cost disallowance associated with catastrophic wildfires and applies a more credit supportive prudence standard. This option would also foster a more expedient subrogation claims settlement process when claims are settled at or below 40% of the gross claim.

If and when the insurance fund's claims paying capability is exhausted, the majority of the credit friendly structures, including the disallowance cap, will terminate. However, the more favorable prudence standard, which is similar to the standard applied by the Federal Energy Regulatory Commission (FERC), will remain in place. This change in the prudence standard is important because, in the case of SDG&E's 2007 wildfires, while the California Public Utility Commission (CPUC) denied recovery, the FERC ruled that SDG&E acted prudently and allowed the recovery of the wildfires costs. Pending application of this revised standard by the CPUC, its implementation would likely strengthen our view of the credit supportiveness of the regulatory environment in California.

In contrast, the liquidity fund, which has a smaller balance initially compared to the insurance fund, does not include a cap on disallowances or a revised prudence standard, making it much less credit supportive. Its key advantage is that, unlike the insurance fund, it is always replenished. As either the utility or ratepayer will reimburse the fund, depending on if the utility was found to have acted prudently.

We believe the size of the insurance fund should will account for all but the most extreme downside scenarios. Assuming that Pacific Gas & Electric Company participates, the fund will be capitalized with \$21 billion of capital but has a gross claims paying capability of more than \$40 billion. According to Filsinger Energy Partners, a consultant to California Governor Newsome's office, this funding level has only a 0.9% chance of being exhausted by 2030. The calculation assumes the wildfire experience of the past five years continues, utilities maintain \$1 billion of wildfire liability insurance, and 75% of wildfire costs are disallowed in 2020 but falling steadily to 25% by 2030.

SDG&E's Baa1 rating acknowledges the utility's smaller service territory compared to its peers along with its more effective wildfire mitigation and prevention programs. This factor contributes to the legislature's expectation of a smaller wildfire allocation metric under AB 1054. SDG&E estimates that its portion of shareholder contribution to the insurance-like fund will only be around \$450 million, including an initial payment of approximately \$325 million with the remaining balance payable over a 10-year period. Importantly, the Baa1 rating assumes a credit supportive outcome of SDG&E's ongoing 2019 general rate case and cost of capital proceeding where the utility requested an increase in its equity layer to 56% (effective January 2020) from currently 52%. The outcome of these regulatory proceedings will be important for SDG&E's ability to further generate a ratio of CFO pre-W/C to debt that comfortably exceeds 20% on a sustained basis.

Outlook

The maintenance of the negative outlook reflects the uncertainty around SDG&E's and SCE's collective choice of an insurance fund or a liquidity fund.

Factors that could lead to an upgrade

We could consider a stable outlook, or potentially a positive outlook, if the insurance fund is chosen. Under this scenario, in the absence of a catastrophic wildfire, an eventual upgrade of SDG&E's ratings is possible if the provisions under AB 1054 are successfully implemented on a timely basis and if the outcomes of its pending regulatory proceedings are credit supportive.

Factors that could lead to a downgrade

A downgrade could be considered if the liquidity fund is chosen. Failure to successfully implement the provisions of AB 1054 associated with the insurance fund in a consistent and credit supportive manner would also likely trigger negative momentum on the rating. Downward pressure is also likely if SDG&E records a ratio CFO pre-W/C to debt below 18% on a sustained basis.

The principal methodology used in these ratings was Regulated Electric and Gas Utilities published in June 2017. Please see the Rating Methodologies page on www.moodys.com for a copy of this methodology.

SDG&E is a regulated electric utility that operates in San Diego County and part of Orange County (nearly 1.5 million electric customers) while it also renders natural gas distribution services in San Diego County (nearly 0.9 million customers). Its service territory covers 4,100 square miles. SDG&E is predominantly a transmission

and distribution company subject to the oversight of the CPCU and the Federal Energy Regulatory Commission. Following the retirement of the San Onofre Nuclear Generating Station (SONGS), in which SDG&E held a 20% interest stake, the utility's owned electric generation assets approximates 2,000 MW. These consist of two natural gas Combined Cycle units (CCGTs; 1,045 MW), two peaking units (around 140 MW) and two small solar facilities. SDG&E is a wholly-owned subsidiary of Sempra Energy (Baa1 negative) a holding company that owns regulated electric and gas utilities as well as subsidiaries that operate long-term contracted assets.

REGULATORY DISCLOSURES

For ratings issued on a program, series or category/class of debt, this announcement provides certain regulatory disclosures in relation to each rating of a subsequently issued bond or note of the same series or category/class of debt or pursuant to a program for which the ratings are derived exclusively from existing ratings in accordance with Moody's rating practices. For ratings issued on a support provider, this announcement provides certain regulatory disclosures in relation to the credit rating action on the support provider and in relation to each particular credit rating action for securities that derive their credit ratings from the support provider's credit rating. For provisional ratings, this announcement provides certain regulatory disclosures in relation to the provisional rating assigned, and in relation to a definitive rating that may be assigned subsequent to the final issuance of the debt, in each case where the transaction structure and terms have not changed prior to the assignment of the definitive rating in a manner that would have affected the rating. For further information please see the ratings tab on the issuer/entity page for the respective issuer on www.moodys.com.

For any affected securities or rated entities receiving direct credit support from the primary entity(ies) of this credit rating action, and whose ratings may change as a result of this credit rating action, the associated regulatory disclosures will be those of the guarantor entity. Exceptions to this approach exist for the following disclosures, if applicable to jurisdiction: Ancillary Services, Disclosure to rated entity, Disclosure from rated entity.

Regulatory disclosures contained in this press release apply to the credit rating and, if applicable, the related rating outlook or rating review.

Please see www.moodys.com for any updates on changes to the lead rating analyst and to the Moody's legal entity that has issued the rating.

Please see the ratings tab on the issuer/entity page on www.moodys.com for additional regulatory disclosures for each credit rating.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any rating, agreed to pay to Moody's Investors Service, Inc. for ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$2,700,000. MCO and MIS also maintain policies and procedures to address the independence of MIS's ratings and rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold ratings from MIS and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moodys.com under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any rating, agreed to pay to MJKK or MSFJ (as applicable) for ratings opinions and services rendered by it fees ranging from JPY125,000 to approximately JPY250,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.

APPENDIX C

FITCH JULY 17 REPORT

Fitch Affirms San Diego Gas & Electric's IDR at 'BBB+'; Outlook Revised to Stable

Fitch Ratings - New York - 17 July 2019:

Fitch Ratings has affirmed San Diego Gas & Electric Co.'s (SDG&E) Long-Term Issuer Default Rating (IDR) at 'BBB+' and revised the Rating Outlook to Stable from Negative. About \$5 billion debt is affected by today's rating action.

The enactment of A.B. 1054 is credit supportive for SDG&E, providing protection against future catastrophic wildfires at a reasonable cost, in Fitch's view. The legislation provides the option to establish either a \$10.5 billion liquidity fund or a large, \$21 billion insurance fund. In addition, A.B. 1054 shifts the burden of proof to a more reasonable standard, limits utility liability for imprudence and provides a wildfire safety certificate process.

Fitch believes SDG&E and Southern California Edison Company (SoCalEd) will choose to participate in the wildfire insurance fund, given the incentives to do so that include funding to defray wildfire-related third party liabilities, limitations of liability for imprudent conduct and improved burden of proof standards.

The continuation of inverse condemnation remains a long-term credit issue for SDG&E as an electric utility in California. Other credit constraints include contagion risks associated with comingling of funds in the wildfire fund, given its materially different service territory and safety culture, and the lack of a track record of implementing the new legislation especially the new prudence standard which is subject to interpretation.

Key Rating Drivers

Insurance Fund Cushion:

The enactment of A.B 1054 and anticipated creation of a \$21 billion wildfire insurance fund under the law is a major credit positive. The magnitude of the fund is further enhanced by a 40% limitation of subrogation claims under the law. Fitch understands that the fund is subject to a deductible of the greater of \$1 billion or a utility's insurance coverage. The insurance fund will provide a bridge to fund potential liabilities, without increasing customer rates, as the state pursues a comprehensive effort to battle catastrophic wildfires on several fronts including enhanced forestry management, building standards and changes in state and utility investment, operation, cooperation, preparedness and response.

Strong Incentive to Opt-in:

A.B. 1054 codifies establishment of either a wildfire liquidity (\$10.5 billion) or wildfire insurance fund (\$21 billion). It includes strong incentives for the three large investor-owned utilities (IOUs) in the state to opt for the larger wildfire insurance fund. Fitch's base rating case assumes SDG&E and the other two large IOUs will opt-in to the larger wildfire fund given significant incentives and political goodwill. Fitch estimates SDG&E's initial and annual contributions over the next 10 years to be approximately \$323 million and \$13 million, respectively. The contribution is excluded from the SDG&E's regulatory capital structure. Bankruptcy proceedings will present incremental hurdles and uncertainty regarding participation by PG&E Corporation (PCG, Not Rated) and its subsidiary Pacific Gas and Electric Company (PG&E, Not Rated) in the wildfire insurance fund. PCG and PG&E filed for bankruptcy earlier this year.

Reasonable Prudence Standard:

The legislation shifts the burden of proof to a more reasonable standard. Under A.B. 1054, if a utility holds a valid safety certification, it is deemed to be prudent unless a party to the proceedings creates a serious doubt as to the reasonableness of the utility's conduct. We understand that this is consistent with standards applied by the Federal Energy Regulatory Commission (FERC). FERC approved SDG&E's net 2007 wildfire-related jurisdictional liabilities while the California Public Utilities Commission (CPUC) rejected SDG&E's petition for recovery of net jurisdictional costs. The legislation also mandates a certification process that includes annual filings of wildfire mitigation plans and requires greater focus on utility safety culture from the board of directors to rank-and-file employees and links executive compensation to safety.

Imprudence Risk Capped:

In the event that a utility is found to be imprudent, A.B. 1054 limits the cumulative amount of liability to 20% of the utility's transmission and distribution equity rate base including the FERC rate base over a rolling three-calendar-year period, or approximately \$800 million for SDG&E based on its rate base as of Dec. 31, 2018, if it opts to participate in the wildfire insurance fund.

Minimal Lag:

Settlements of subrogation claims that are up to 40% of the total asserted claim value will be approved by the fund administrator unless the administrator finds that exceptional facts or circumstances do not justify the settlements. Administrator's approval is not subject to review by the CPUC, which is expected to reduce regulatory lag and preserve the utility's financial health. The administrator could also approve subrogation claims that are above 40% of the asserted claims value as long as it finds that the utility exercised reasonable business judgement based on facts and circumstances that justify the higher percentage.

Modest Reduction in Earnings:

In exchange for participating in the fund, SDG&E and other IOUs will agree to forgo the equity returns on their share of the first \$5 billion fire mitigation capex. For SDG&E, Fitch estimates that earnings will reduce by approximately \$11 million annually.

Credit Metrics:

SDG&E's credit metrics are strong for its ratings. It has sufficient headroom to absorb the financial impact of the initial and annual contributions as well as the loss of earnings for its share of the first \$5 billion of combined fire mitigation capex. Fitch estimates that SDG&E's FFO adjusted leverage could average approximately 4x. The calculation is based on Fitch's conservative assumption that SDG&E could potentially finance the entire contribution by debt, as the contribution will be excluded from the regulatory capital structure.

Contagion Risk:

Funds available to SDG&E will be affected by the frequency and severity of wildfires in other IOUs' service territories as well as their safety conduct which is less favorable, in Fitch's view. If the fund is depleted, the limit of each utility's liability does not apply. SDG&E's much smaller and less-wooded service territory, 60% of underground distribution system, a track record of robust fire prevention and mitigation programs have contributed to the lack of large wildfires in its service territory in the last decade.

Derivation Summary

The enactment of A.B.1054 mitigates the regulatory risks associated with the recovery of catastrophic wildfire liabilities for SDG&E and other IOUs in California SoCalEd and PG&E. SDG&E's exposure to wildfire risks is less severe than its peers, due to its 60% underground distribution system, much smaller service territory and robust fire prevention and mitigation programs. SDG&E does not have material financial exposure from major fires in recent years whereas PG&E and SoCalEd are likely to face significant financial pressure related to the third-party liabilities from several large wildfires in 2017 and 2018. SDG&E's historical credit metrics are on a par with its peers. In the past three years, SDG&E produced an average FFO-adjusted leverage of 3.1x, compared with PG&E's 3.2x and SoCalEd's 3.1x. Fitch estimates that SDG&E's FFO adjusted leverage will range from high 3x to 4x in the next few years depending on how it will fund its contribution to the insurance fund. In contrast, SoCalEd's credit metrics could be considerably weaker than those of SDG&E going forward as the financial impact of the 2017 and 2018 wildfires unfold.

Key Assumptions

- SDG&E elects to opt for the insurance fund;
- Initial contribution of \$323 million to the insurance fund and \$13 million annual contribution for 10 years;
- No equity earnings on SDG&E's share of total of \$5 billion fire mitigation capex or approximately \$215 million;
- Capex at SDG&E in the next five years totals \$6.75 billion (midpoint guidance);
- Existing ROE 10.2% and 3.5% attrition rate continue through 2022.

RATING SENSITIVITIES

Developments That May, Individually or Collectively, Lead to Positive Rating Action:

- Effective implementation of A.B 1054 and continued success in minimizing wildfire activities;

- A favorable GRC order and/or meaningful improvement in rate regulation;
- There are indications that a repeal of inverse condemnation doctrine is forthcoming.

Developments That May, Individually or Collectively, Lead to Negative Rating Action:

- Frequency and magnitude of catastrophic wildfires in the next few years deplete the fund much sooner than expected;
- FFO-adjusted leverage above 5x on a sustained basis.

Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the

information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

FORM 8-K

Item 8.01 Other Events.

As previously reported by Sempra Energy and San Diego Gas & Electric Company (“SDG&E”), a subsidiary of Sempra Energy, in a [Form 8-K](#) filed with the U.S. Securities and Exchange Commission on July 12, 2019 (the “Prior Form 8-K”) and incorporated herein by reference, California Assembly Bills 1054 and 111 (collectively, the “Wildfire Legislation”) were approved by the California legislature. On July 12, 2019, Governor Newsom signed the Wildfire Legislation into law. The Wildfire Legislation provides for an option whereby investor-owned electric utilities (“IOUs”) not subject to an insolvency proceeding, which are SDG&E and Southern California Edison Company (“Edison”), may each notify the California Public Utilities Commission (“CPUC”) of its commitment to provide shareholder contributions to a Wildfire Fund. As described in the Prior [Form 8-K](#), there are material benefits available to participating IOUs in the larger Wildfire Fund that are not available in the smaller Liquidity Fund. In accordance with the Wildfire Legislation, on July 18, 2019, SDG&E notified the CPUC of its commitment to provide its shareholder contributions to the Wildfire Fund. However, the Wildfire Fund will only be created if Edison also commits to provide its shareholder contributions. The deadline for Edison to indicate whether they will commit to contributing to the Wildfire Fund is July 27, 2019.

Subject to Edison committing to contribute to the Wildfire Fund, both Edison and SDG&E would be required to make their initial contributions by September 10, 2019, as well as 10 annual contributions by January 1 of each subsequent year. SDG&E’s initial contribution would be \$322.5 million, and its annual contribution would be \$12.9 million each year for 10 years, all of which would be funded by SDG&E’s shareholders.

While SDG&E is currently evaluating the accounting and tax treatment of the initial contribution and annual contributions, our conclusion regarding the ultimate accounting treatment may result in, among other possibilities, a charge against the earnings of Sempra Energy and SDG&E in the third quarter of 2019, which in any event would not be greater than SDG&E’s total initial and annual contributions to the fund.

Information Regarding Forward-Looking Statements

We make statements in this report that are not historical fact and constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are based upon assumptions with respect to the future, involve risks and uncertainties, and are not guarantees of performance. These forward-looking statements represent our estimates and assumptions only as of the filing date of this report. We assume no obligation to update or revise any forward-looking statement as a result of new information, future events or other factors.

In this report, when we use words such as “believes,” “expects,” “anticipates,” “plans,” “estimates,” “projects,” “forecasts,” “contemplates,” “assumes,” “depends,” “should,” “could,” “would,” “will,” “confident,” “may,” “can,” “potential,” “possible,” “proposed,” “target,” “pursue,” “outlook,” “maintain,” or similar expressions, or when we discuss our guidance, strategy, plans, goals, vision, mission, opportunities, projections, initiatives, objectives or intentions, we are making forward-looking statements.

Factors, among others, that could cause our actual results and future actions to differ materially from those described in any forward-looking statements include risks and uncertainties relating to: the greater degree and prevalence of wildfires in California in recent years and the risk that we may be found liable for damages regardless of fault, such as where inverse condemnation applies, and risk that we may not be able to recover any such costs in rates from customers in California; actions and the timing of actions, including decisions, new regulations and issuances of authorizations by the California Public Utilities Commission, U.S. Department of Energy, California Department of Conservation’s Division of Oil, Gas, and Geothermal Resources, U.S. Environmental Protection Agency, Federal Energy Regulatory Commission, Pipeline and Hazardous Materials Safety Administration, states, cities and counties, and other regulatory and governmental bodies in the U.S.; the success of business development efforts and construction projects, including risks in (i) obtaining or maintaining authorizations; (ii) completing construction projects on schedule and budget; (iii) counterparties’ ability to fulfill contractual commitments; (iv) winning competitively bid infrastructure projects; and (v) the ability to realize anticipated benefits from any of these efforts once completed; the resolution of civil and criminal litigation and regulatory investigations and proceedings; actions by credit rating agencies to downgrade our credit ratings or to place those ratings on negative outlook and our ability to borrow at favorable interest rates; deviations from regulatory precedent or practice that result in a reallocation of benefits or burdens among shareholders and ratepayers; denial of approvals of proposed settlements; delays in, or denial of, regulatory agency authorizations to recover costs in rates from customers or regulatory agency approval for projects required to enhance

safety and reliability; moves to reduce or eliminate reliance on natural gas; the availability of electric power and natural gas and natural gas storage capacity, including disruptions caused by failures in the transmission grid, limitations on the withdrawal or injection of natural gas from or into storage facilities, and equipment failures; weather conditions, natural disasters, accidents, equipment failures, computer system outages, explosions, terrorist attacks and other events that disrupt our operations, damage our facilities and systems, cause the release of harmful materials, cause fires and subject us to third-party liability for property damage or personal injuries, fines and penalties, some of which may not be covered by insurance (including costs in excess of applicable policy limits), may be disputed by insurers or may otherwise not be recoverable through regulatory mechanisms or may impact our ability to obtain satisfactory levels of affordable insurance; cybersecurity threats to the energy grid, storage and pipeline infrastructure, the information and systems used to operate our businesses and the confidentiality of our proprietary information and the personal information of our customers and employees; changes in capital markets, energy markets and economic conditions, including the availability of credit; and volatility in interest and inflation rates and commodity prices and our ability to effectively hedge the risk of such volatility; the impact of federal or state tax reform and our ability to mitigate adverse impacts; the impact on competitive customer rates and reliability of electric transmission and distribution systems due to the growth in distributed and local power generation and from possible departing retail load resulting from customers transferring to Direct Access and Community Choice Aggregation or other forms of distributed and local power generation and the potential risk of nonrecovery for stranded assets and contractual obligations; and other uncertainties, some of which may be difficult to predict and are beyond our control.

We caution you not to rely unduly on any forward-looking statements. You should review and consider carefully the risks, uncertainties and other factors that affect our business as described herein and in our most recent Annual Report on Form 10-K and other reports that we file with the U.S. Securities and Exchange Commission.

APPENDIX E

MOODY'S JULY 29 REPORT

Rating Action: Moody's affirms San Diego Gas & Electric's ratings; changes outlook to positive from negative

29 Jul 2019

Approximately \$5 billion of debt securities affected

New York, July 29, 2019 -- Moody's Investors Service ("Moody's") today affirmed San Diego Gas & Electric Company's (SDG&E) ratings, including its Baa1 Issuer rating, A2 senior secured rating as well as its P-2 short-term rating for commercial paper. The outlook was changed to positive from negative. See rating list below for the complete list of ratings for SDG&E.

RATINGS RATIONALE

"With the establishment of the insurance-like fund and after receiving the legislatively required wildfire safety certification, two key conditions of the recently enacted wildfire mitigation legislation Assembly Bill 1054, we expect that SDG&E's future wildfires liabilities will be capped" said Natividad Martel VP-Senior Analyst. "We view this liability cap, along with the favorable prudency standard put in place, as supportive of SDG&E's credit quality" added Martel. "SDG&E's positive outlook acknowledges the utility's effective wildfire mitigation initiatives and assumes that in the absence of any catastrophic wildfires in its service territory it will be able to record run-rate ratio of CFO pre-W/C to debt of at least 22%, on a sustained basis".

The liability cap on cost disallowances is the most credit supportive feature of the insurance fund because it allows us to quantify and limit a utility's maximum exposure to a catastrophic wildfire event if the utility is not found to be prudent according to the new prudency standard. Pursuant to the provisions under AB 1054, we estimate that the maximum cap would be around \$800 million for SDG&E which equals to 20% of the utility's current transmission and distribution equity rate base over any three consecutive years. The cap will not, however, cover gross negligence.

If the insurance fund's claims-paying capability is exhausted, the majority of the credit supportive provisions, including the disallowance cap, will terminate. However, the more favorable prudency standard, which is similar to the standard applied by the Federal Energy Regulatory Commission (FERC), will still remain in place. Pending application of this revised standard by the California Public Utilities Commission, its implementation would likely strengthen our view of the credit supportiveness of the regulatory environment in California.

The size of the fund is an important consideration for SDG&E's credit quality. Even though the fund is capitalized with \$21 billion of capital, assuming Pacific Gas & Electric Company (ratings withdrawn) also participates, it should be able to address over \$40 billion of gross claims. The actual net usage of the insurance fund should be considerably lower than the gross claim amounts because utilities are expected to maintain \$1 billion of wildfire insurance each and the fund is designed to only pay subrogation claims that are settled at 40 cents on the dollar or less.

It is notoriously difficult to model wildfire risk because it is hard to quantify the effects of weather, climate change and the utilities' risk mitigation measures. Nonetheless, we believe the insurance fund will be large enough to cover all but the most extreme downside scenarios over the next decade. According to Filsinger Energy Partners, a consultant to California Governor Newsome's office, this funding level has only a 0.9% chance of being exhausted by 2030. The calculation assumes that the wildfire experience of the past five years continues, utilities maintain \$1 billion of wildfire liability insurance, and 75% of wildfire costs are disallowed in 2020 but this falls steadily to 25% by 2030.

Outlook

The positive outlook assumes that, barring any wildfires in its service territory, the utility will continue to record credit metrics that are robust for its current rating, specifically, a run-rate ratio of CFO pre-W/C to debt of at least 22%. This expectation assumes that SDG&E's parent company, Sempra Energy (Baa1 negative), will fund the utility's contributions to the insurance-like fund and credit supportive outcomes of the utility's ongoing regulatory proceedings. These proceedings include its 2019 general rate case and the cost of capital, which a decision anticipated before year-end 2019.

Factors that could lead to an upgrade

Positive momentum on SDG&E's rating is possible, barring any wildfire in its service territory, following the completion of its pending 2019 general rate case and the cost of capital proceedings as well as after making the initial contribution to the wildfire fund, if it is able to report run-rate CFO pre-W/C to debt in excess of 22%, excluding one-time effects on its operational cash flows from the implementation of the fund, on a sustained basis.

Factors that could lead to a downgrade

Failure to successfully implement the provisions of AB 1054 associated with the insurance fund in a consistent and credit supportive manner would likely trigger negative momentum on the rating. Downward pressure is also likely if SDG&E records credit metrics that are weaker than currently anticipated for example due to outcomes of pending regulatory proceedings that are not credit supportive, or if it funds any future catastrophic wildfire claims with incremental debt; specifically, if its run-rate ratio of CFO pre-W/C to debt falls below 18% on a sustained basis.

The principal methodology used in these ratings was Regulated Electric and Gas Utilities published in June 2017. Please see the Rating Methodologies page on www.moodys.com for a copy of this methodology.

SDG&E is a regulated electric utility that operates in San Diego County and part of Orange County (nearly 1.5 million electric customers) while it also renders natural gas distribution services in San Diego County (nearly 0.9 million customers). Its service territory covers 4,100 square miles. SDG&E is predominantly a transmission and distribution company subject to the oversight of the CPCU and the Federal Energy Regulatory Commission. Following the retirement of the San Onofre Nuclear Generating Station (SONGS), in which SDG&E held a 20% interest stake, the utility's owned electric generation assets approximates 2,000 MW. These consist of two natural gas Combined Cycle units (CCGTs; 1,045 MW), two peaking units (around 140 MW) and two small solar facilities. SDG&E is a wholly-owned subsidiary of Sempra Energy (Baa1 negative) a holding company that owns regulated electric and gas utilities as well as subsidiaries that operate long-term contracted assets.

REGULATORY DISCLOSURES

For ratings issued on a program, series or category/class of debt, this announcement provides certain

regulatory disclosures in relation to each rating of a subsequently issued bond or note of the same series or category/class of debt or pursuant to a program for which the ratings are derived exclusively from existing ratings in accordance with Moody's rating practices. For ratings issued on a support provider, this announcement provides certain regulatory disclosures in relation to the credit rating action on the support provider and in relation to each particular credit rating action for securities that derive their credit ratings from the support provider's credit rating. For provisional ratings, this announcement provides certain regulatory disclosures in relation to the provisional rating assigned, and in relation to a definitive rating that may be assigned subsequent to the final issuance of the debt, in each case where the transaction structure and terms have not changed prior to the assignment of the definitive rating in a manner that would have affected the rating. For further information please see the ratings tab on the issuer/entity page for the respective issuer on www.moody.com.

For any affected securities or rated entities receiving direct credit support from the primary entity(ies) of this credit rating action, and whose ratings may change as a result of this credit rating action, the associated regulatory disclosures will be those of the guarantor entity. Exceptions to this approach exist for the following disclosures, if applicable to jurisdiction: Ancillary Services, Disclosure to rated entity, Disclosure from rated entity.

Regulatory disclosures contained in this press release apply to the credit rating and, if applicable, the related rating outlook or rating review.

Please see www.moody.com for any updates on changes to the lead rating analyst and to the Moody's legal entity that has issued the rating.

Please see the ratings tab on the issuer/entity page on www.moody.com for additional regulatory disclosures for each credit rating.

MOODY'S
INVESTORS SERVICE

© 2019 Moody's Corporation, Moody's Investors Service, Inc., Moody's Analytics, Inc. and/or their licensors and affiliates (collectively, "MOODY'S"). All rights reserved.

CREDIT RATINGS ISSUED BY MOODY'S INVESTORS SERVICE, INC. AND ITS RATINGS AFFILIATES ("MIS") ARE MOODY'S CURRENT OPINIONS OF THE RELATIVE FUTURE CREDIT RISK OF ENTITIES, CREDIT COMMITMENTS, OR DEBT OR DEBT-LIKE SECURITIES, AND MOODY'S PUBLICATIONS MAY INCLUDE MOODY'S CURRENT OPINIONS OF THE RELATIVE

FUTURE CREDIT RISK OF ENTITIES, CREDIT COMMITMENTS, OR DEBT OR DEBT-LIKE SECURITIES. MOODY'S DEFINES CREDIT RISK AS THE RISK THAT AN ENTITY MAY NOT MEET ITS CONTRACTUAL FINANCIAL OBLIGATIONS AS THEY COME DUE AND ANY ESTIMATED FINANCIAL LOSS IN THE EVENT OF DEFAULT OR IMPAIRMENT. SEE MOODY'S RATING SYMBOLS AND DEFINITIONS PUBLICATION FOR INFORMATION ON THE TYPES OF CONTRACTUAL FINANCIAL OBLIGATIONS ADDRESSED BY MOODY'S RATINGS. CREDIT RATINGS DO NOT ADDRESS ANY OTHER RISK, INCLUDING BUT NOT LIMITED TO: LIQUIDITY RISK, MARKET VALUE RISK, OR PRICE VOLATILITY. CREDIT RATINGS AND MOODY'S OPINIONS INCLUDED IN MOODY'S PUBLICATIONS ARE NOT STATEMENTS OF CURRENT OR HISTORICAL FACT. MOODY'S PUBLICATIONS MAY ALSO INCLUDE QUANTITATIVE MODEL-BASED ESTIMATES OF CREDIT RISK AND RELATED OPINIONS OR COMMENTARY PUBLISHED BY MOODY'S ANALYTICS, INC. CREDIT RATINGS AND MOODY'S PUBLICATIONS DO NOT CONSTITUTE OR PROVIDE INVESTMENT OR FINANCIAL ADVICE, AND CREDIT RATINGS AND MOODY'S PUBLICATIONS ARE NOT AND DO NOT PROVIDE RECOMMENDATIONS TO PURCHASE, SELL, OR HOLD PARTICULAR SECURITIES. NEITHER CREDIT RATINGS NOR MOODY'S PUBLICATIONS COMMENT ON THE SUITABILITY OF AN INVESTMENT FOR ANY PARTICULAR INVESTOR. MOODY'S ISSUES ITS CREDIT RATINGS AND PUBLISHES MOODY'S PUBLICATIONS WITH THE EXPECTATION AND UNDERSTANDING THAT EACH INVESTOR WILL, WITH DUE CARE, MAKE ITS OWN STUDY AND EVALUATION OF EACH SECURITY THAT IS UNDER CONSIDERATION FOR PURCHASE, HOLDING, OR SALE.

MOODY'S CREDIT RATINGS AND MOODY'S PUBLICATIONS ARE NOT INTENDED FOR USE BY RETAIL INVESTORS AND IT WOULD BE RECKLESS AND INAPPROPRIATE FOR RETAIL INVESTORS TO USE MOODY'S CREDIT RATINGS OR MOODY'S PUBLICATIONS WHEN MAKING AN INVESTMENT DECISION. IF IN DOUBT YOU SHOULD CONTACT YOUR FINANCIAL OR OTHER PROFESSIONAL ADVISER.

ALL INFORMATION CONTAINED HEREIN IS PROTECTED BY LAW, INCLUDING BUT NOT LIMITED TO, COPYRIGHT LAW, AND NONE OF SUCH INFORMATION MAY BE COPIED OR OTHERWISE REPRODUCED, REPACKAGED, FURTHER TRANSMITTED, TRANSFERRED, DISSEMINATED, REDISTRIBUTED OR RESOLD, OR STORED FOR SUBSEQUENT USE FOR ANY SUCH PURPOSE, IN WHOLE OR IN PART, IN ANY FORM OR MANNER OR BY ANY MEANS WHATSOEVER, BY ANY PERSON WITHOUT MOODY'S PRIOR WRITTEN CONSENT.

CREDIT RATINGS AND MOODY'S PUBLICATIONS ARE NOT INTENDED FOR USE BY ANY PERSON AS A BENCHMARK AS THAT TERM IS DEFINED FOR REGULATORY PURPOSES AND MUST NOT BE USED IN ANY WAY THAT COULD RESULT IN THEM BEING CONSIDERED A BENCHMARK.

All information contained herein is obtained by MOODY'S from sources believed by it to be accurate and reliable. Because of the possibility of human or mechanical error as well as other factors, however, all information contained herein is provided "AS IS" without warranty of any kind. MOODY'S adopts all necessary measures so that the information it uses in assigning a credit rating is of sufficient quality and from sources MOODY'S considers to be reliable including, when appropriate, independent third-party sources. However, MOODY'S is not an auditor and cannot in every instance independently verify or validate information received in the rating process or in preparing the Moody's publications.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability to any person or entity for any indirect, special, consequential, or incidental losses or damages whatsoever arising from or in connection with the information contained herein or the use of or inability to use any such information, even if MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers is advised in advance of the possibility of such losses or damages, including but not limited to: (a) any loss of present or prospective profits or (b) any loss or damage arising where the relevant financial instrument is not the subject of a particular credit rating assigned by MOODY'S.

To the extent permitted by law, MOODY'S and its directors, officers, employees, agents, representatives, licensors and suppliers disclaim liability for any direct or compensatory losses or damages caused to any person or entity, including but not limited to by any negligence (but excluding fraud, willful misconduct or any other type of liability that, for the avoidance of doubt, by law cannot be excluded) on the part of, or any contingency within or beyond the control of, MOODY'S or any of its directors, officers, employees, agents, representatives, licensors or suppliers, arising from or in connection with the information contained herein or the

use of or inability to use any such information.

NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY CREDIT RATING OR OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY MOODY'S IN ANY FORM OR MANNER WHATSOEVER.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any rating, agreed to pay to Moody's Investors Service, Inc. for ratings opinions and services rendered by it fees ranging from \$1,000 to approximately \$2,700,000. MCO and MIS also maintain policies and procedures to address the independence of MIS's ratings and rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold ratings from MIS and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at www.moodys.com under the heading "Investor Relations — Corporate Governance — Director and Shareholder Affiliation Policy."

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for Japan only: Moody's Japan K.K. ("MJKK") is a wholly-owned credit rating agency subsidiary of Moody's Group Japan G.K., which is wholly-owned by Moody's Overseas Holdings Inc., a wholly-owned subsidiary of MCO. Moody's SF Japan K.K. ("MSFJ") is a wholly-owned credit rating agency subsidiary of MJKK. MSFJ is not a Nationally Recognized Statistical Rating Organization ("NRSRO"). Therefore, credit ratings assigned by MSFJ are Non-NRSRO Credit Ratings. Non-NRSRO Credit Ratings are assigned by an entity that is not a NRSRO and, consequently, the rated obligation will not qualify for certain types of treatment under U.S. laws. MJKK and MSFJ are credit rating agencies registered with the Japan Financial Services Agency and their registration numbers are FSA Commissioner (Ratings) No. 2 and 3 respectively.

MJKK or MSFJ (as applicable) hereby disclose that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by MJKK or MSFJ (as applicable) have, prior to assignment of any rating, agreed to pay to MJKK or MSFJ (as applicable) for ratings opinions and services rendered by it fees ranging from JPY125,000 to approximately JPY250,000,000.

MJKK and MSFJ also maintain policies and procedures to address Japanese regulatory requirements.
